

depending on the disposition of the annual growth

chestnut trees exceeding 7 m girth display

than 60 cm deep leads to great technical a  
to be overcome;

is sound and plain, the occurrence of ring s  
forming inside the increment borer.

## Limits in using chrono

The application of dendrochronological  
from chestnut ring-width series has several

- the complex structural compartmenta
- the arboricultural practices (pruning  
radial growth;
- the absence of a common and re  
growth factor;

This results in a low crossdating q
