In praise of archives (and an open mind)

In a curiosity-driven time-travel through the Holocene, I will use different examples of my recent research to emphasise, and discuss, the potential and limitations of tree-ring data, methods, and concepts to contribute answering pending questions within and between paleoclimatology and ecology, as well as archaeology and history. The interdisciplinary nature of my presentation is intended to stimulate a broad audience interested in and fascinated by the environment(s) we live in – past, present future.
