

# From the Forest to Figures:

## The Lifecycle of Pfynwald's Data

**Trotsiuk Volodymyr**

Swiss Federal Research Institute WSL

# Data Stats

41 unique variables (e.g. Air temperature, VPD, Soil Temperature, ...)

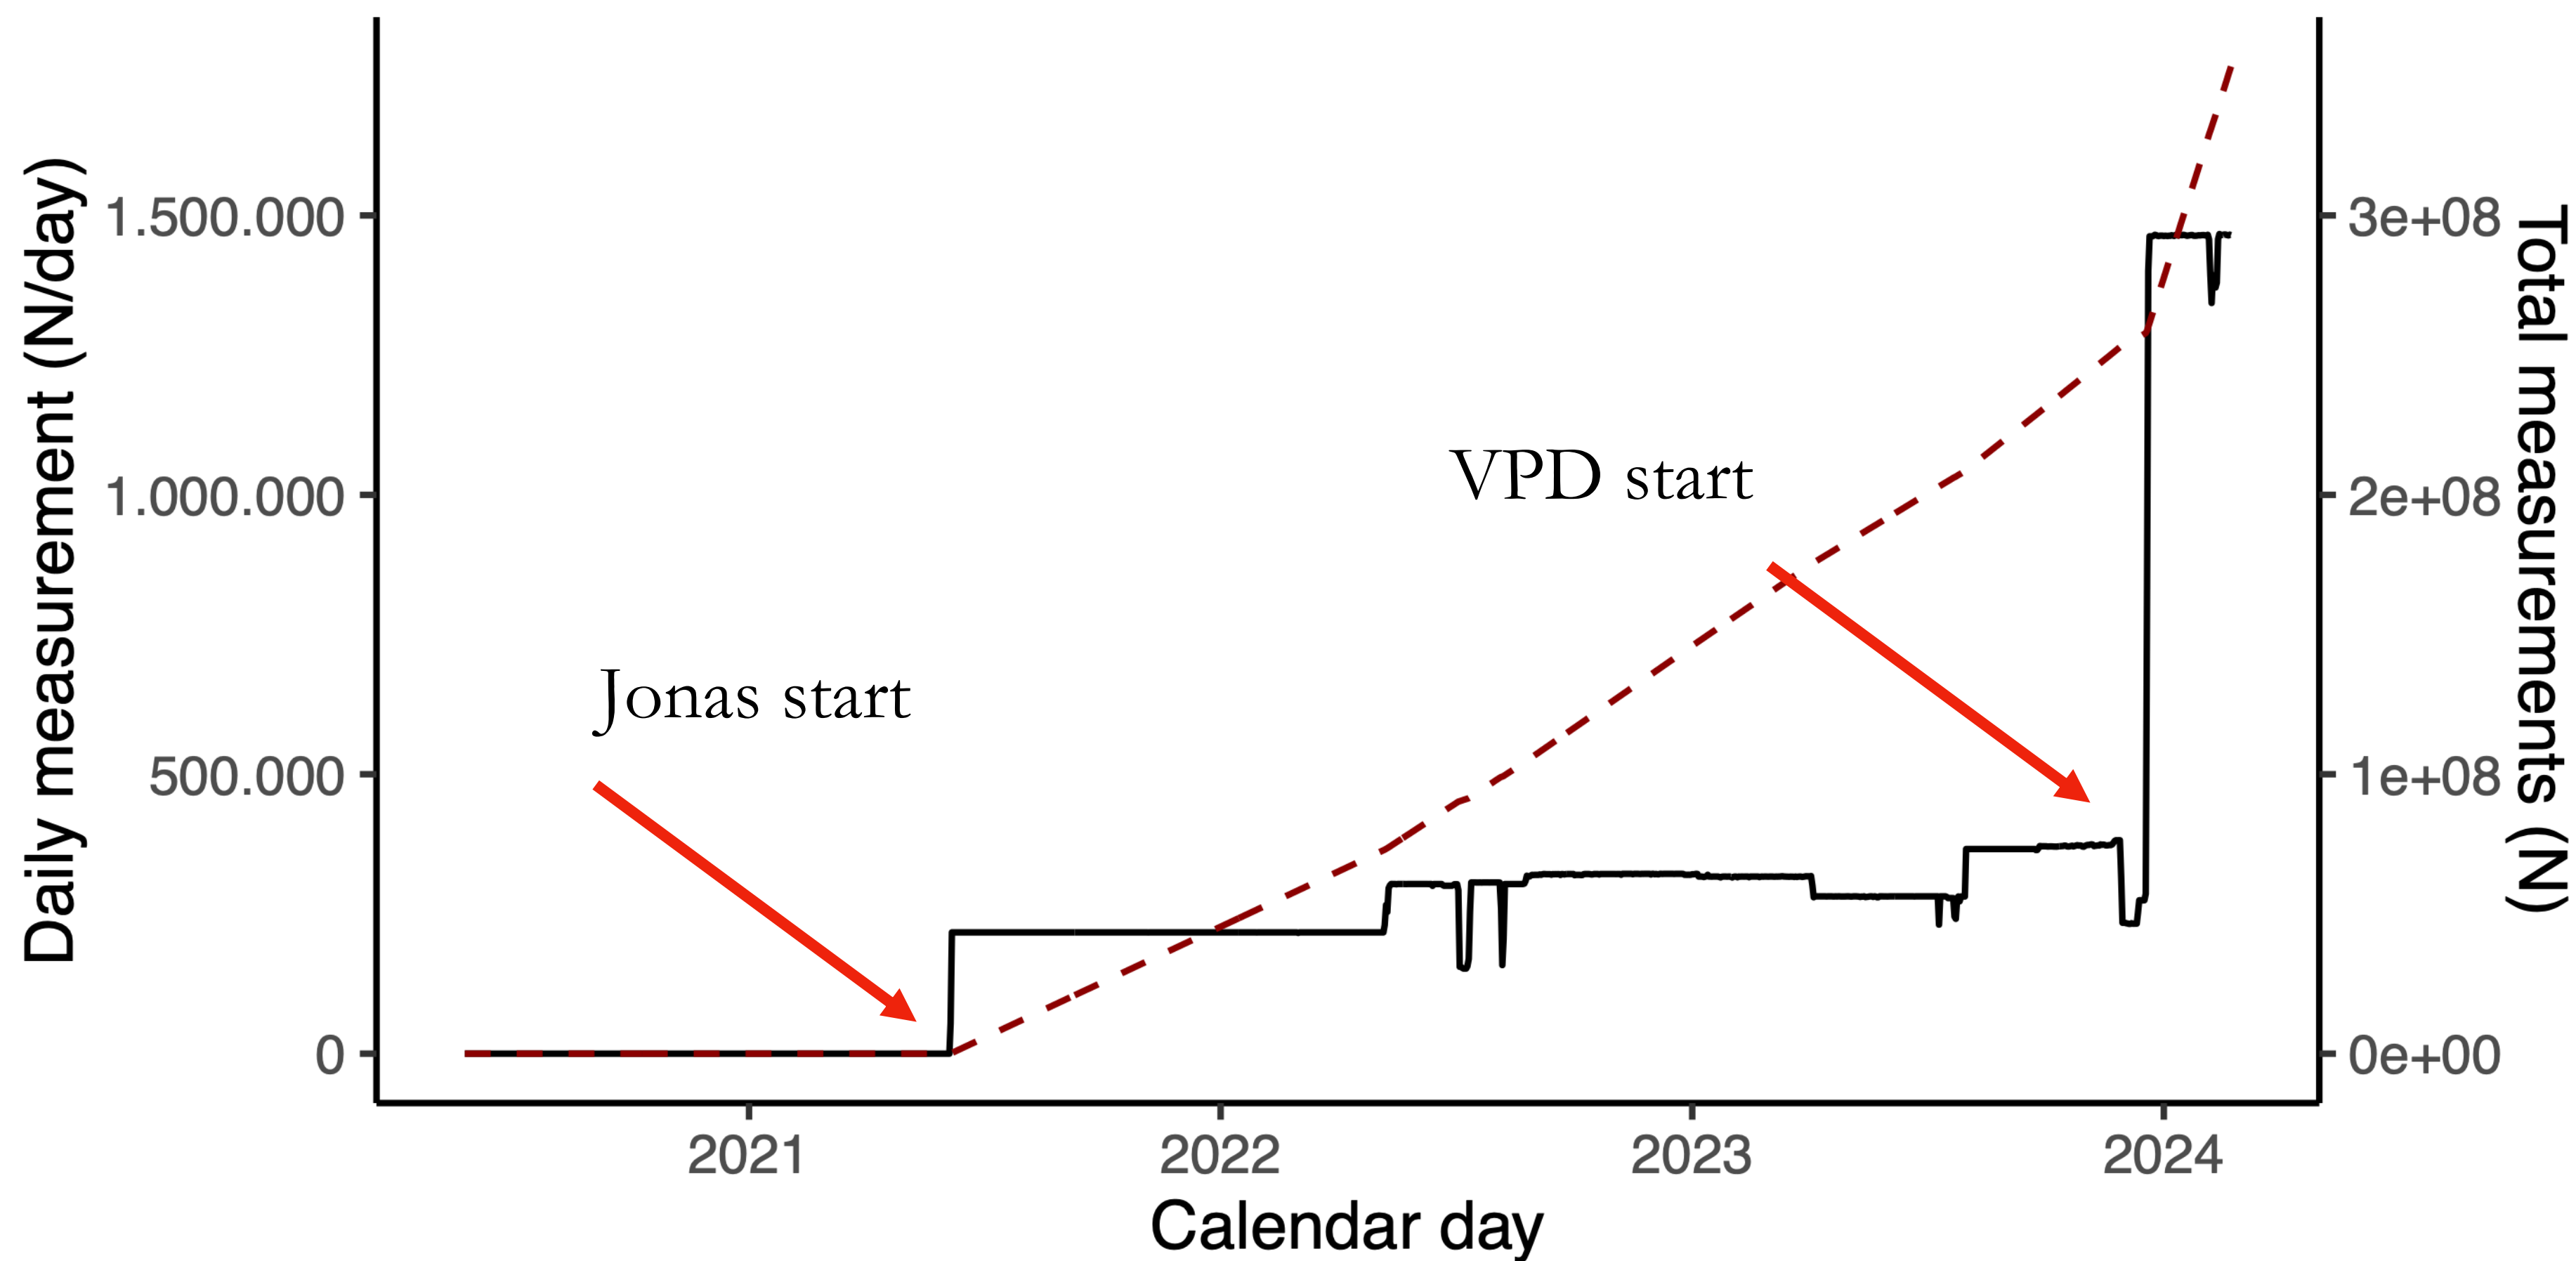

3 247 unique measured points (e.g. Air temperature mean in C° at 10 min in 12 m Scaffold 8, ..)

~ 10 178 values every 10 minutes

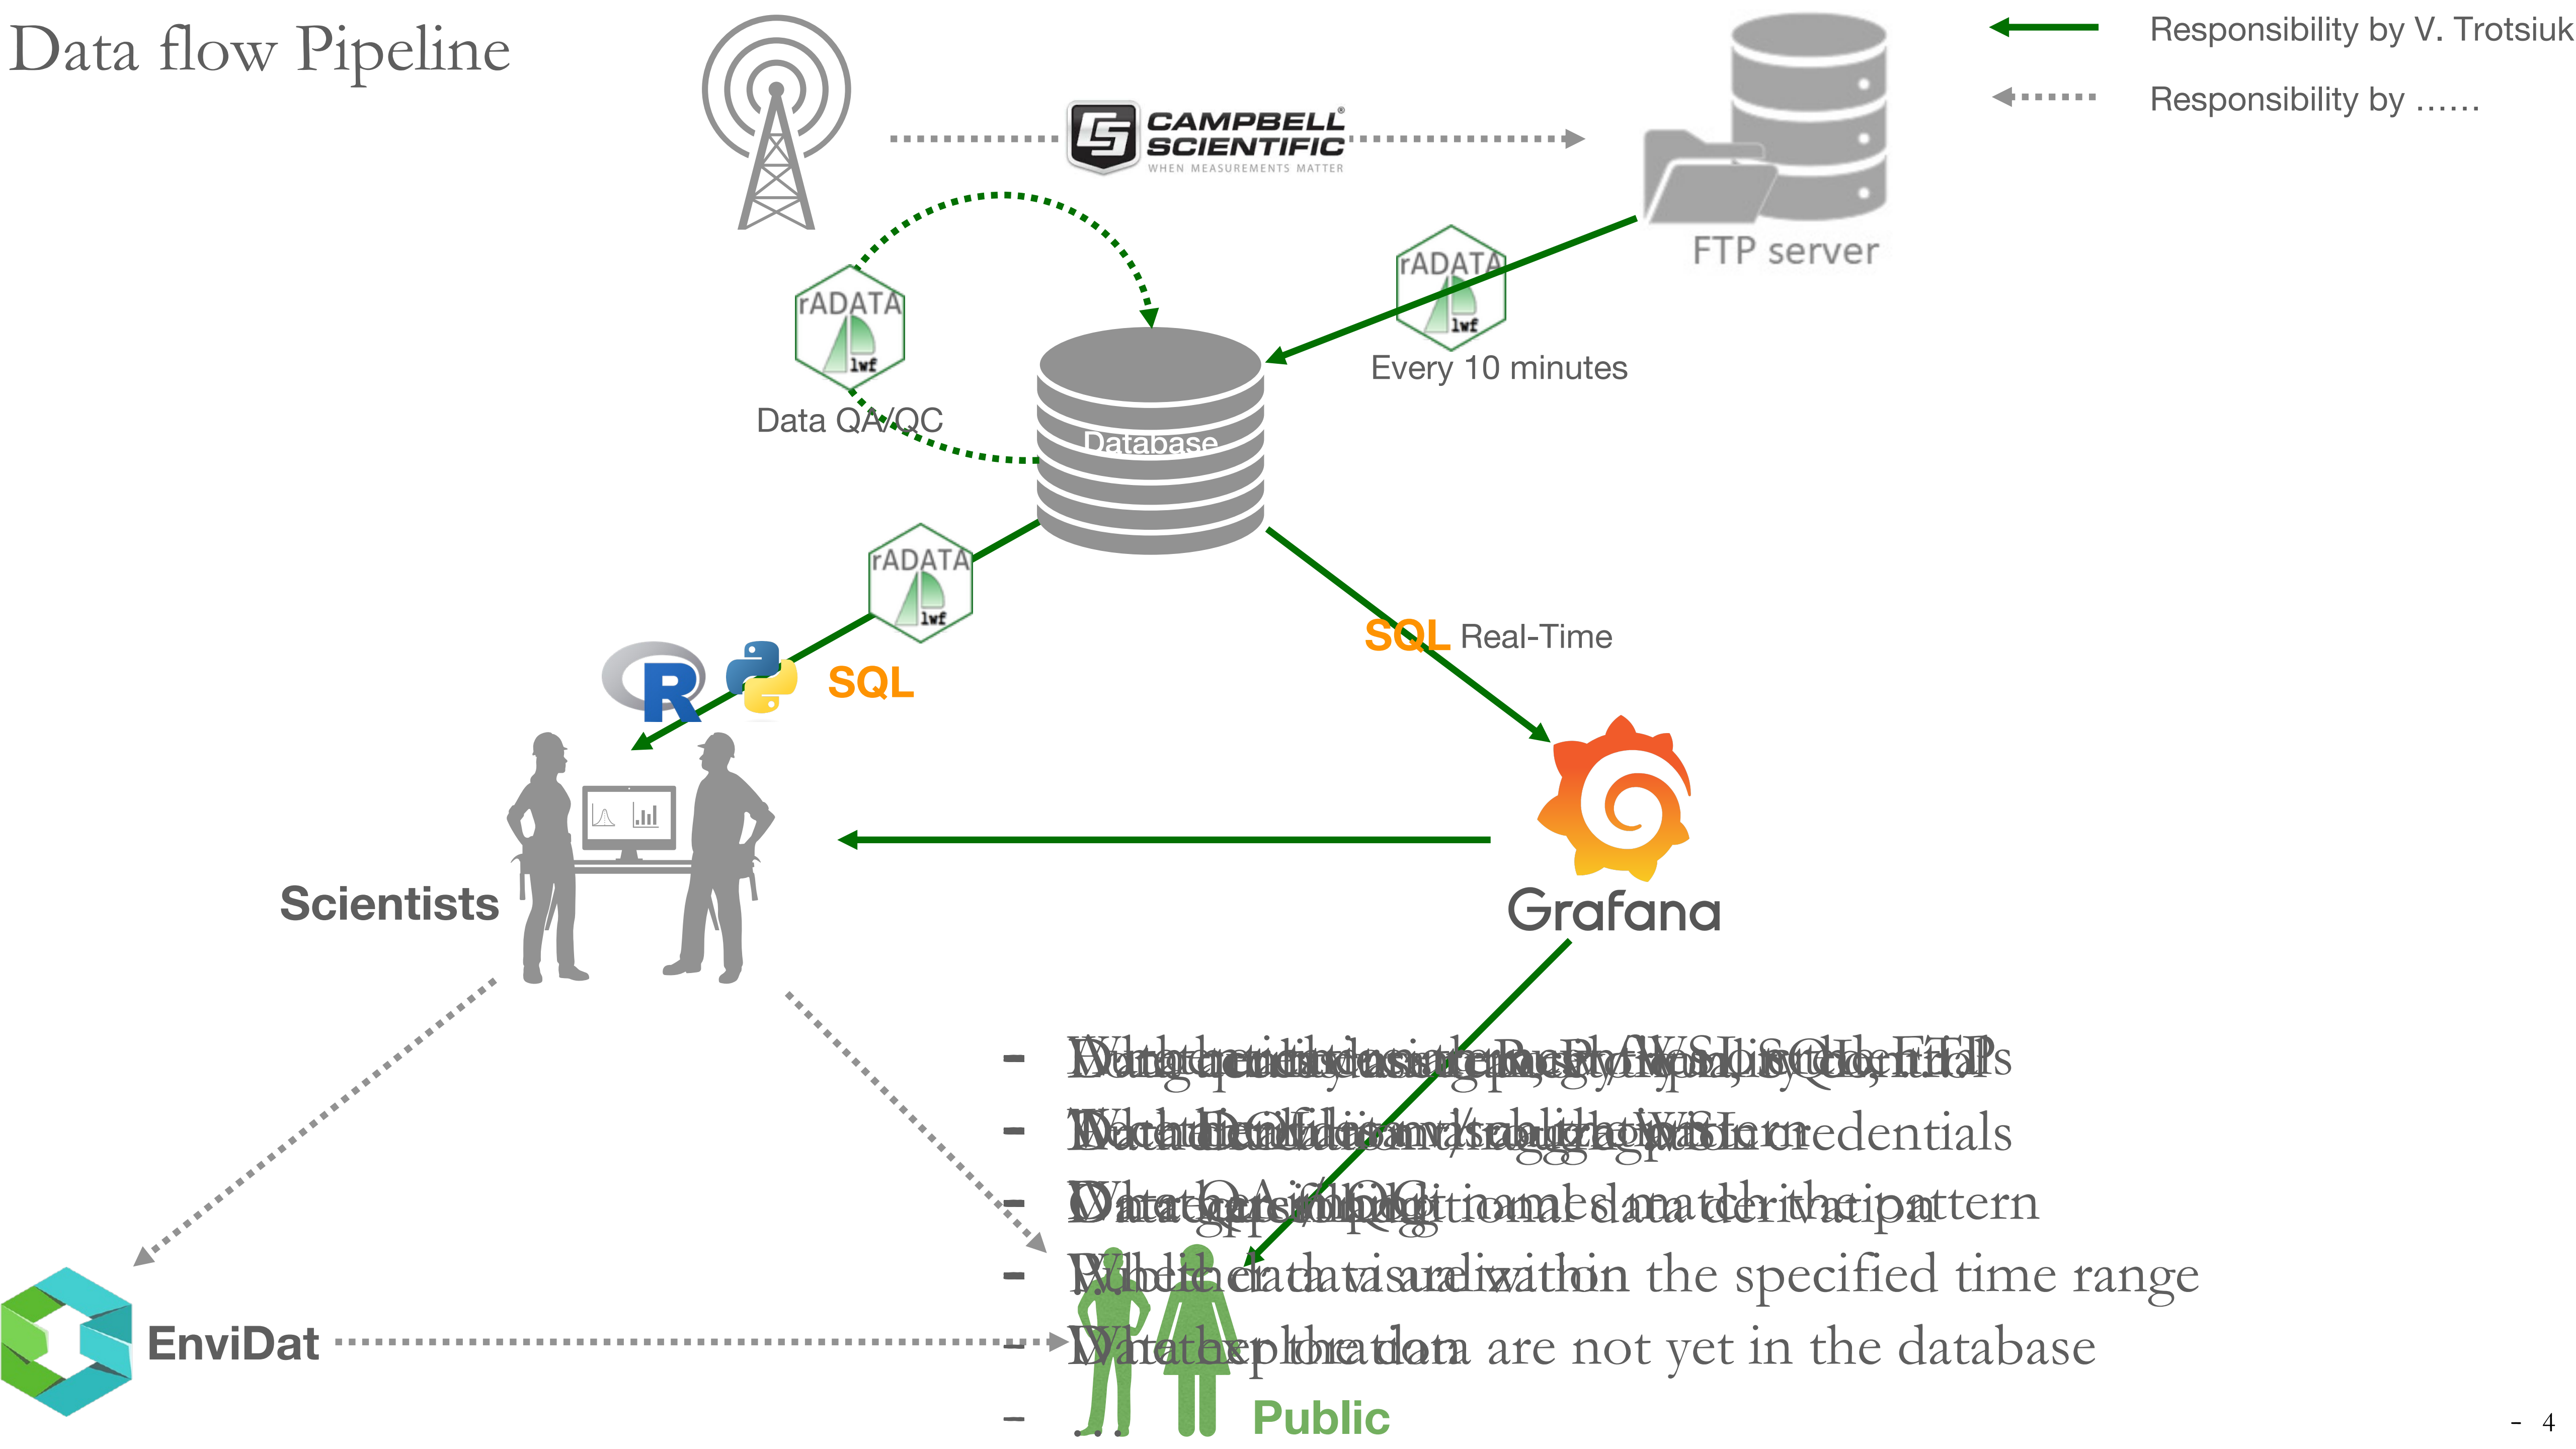

~ 1 464 795 values daily (1.464 Mil)

> 367 943 846 values total (368 Mil, ~22 GB )

\* all information as of 2024-03-04

## Current Soil Temperature and Water Potentia

### Overview

This is an overview of the current and historical Soil Temperature and Water Content. For the more details please expand the respective tabs below

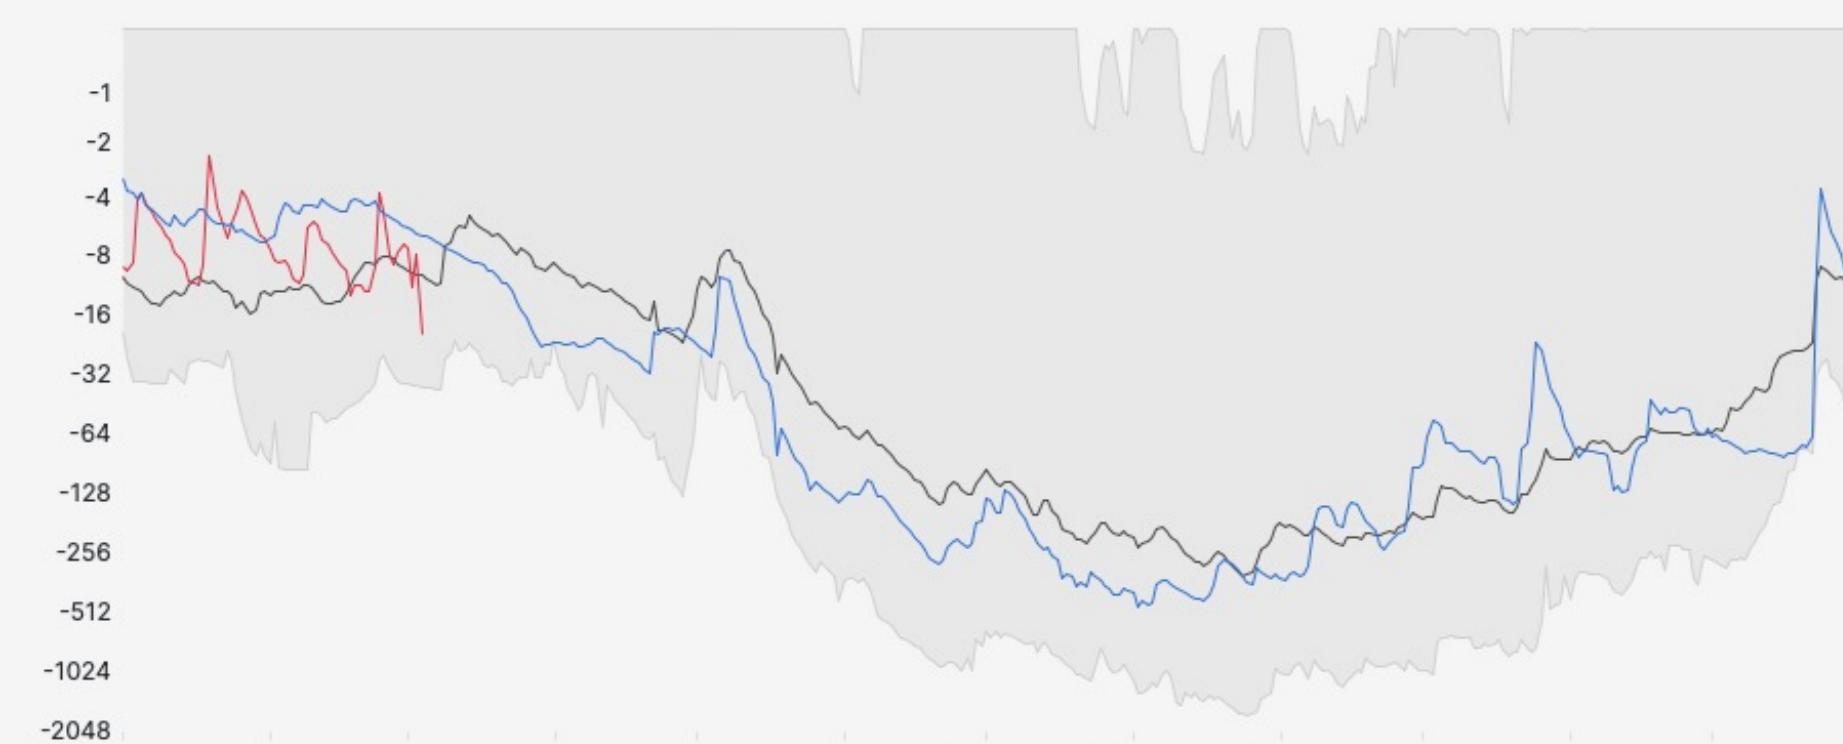

#### Temperature Topsoil (All sites)

2024-03-03 23:00:00	
Long term average	3.08
max	6.74
min	-0.499
Current year	3.26
2022 average	2.48

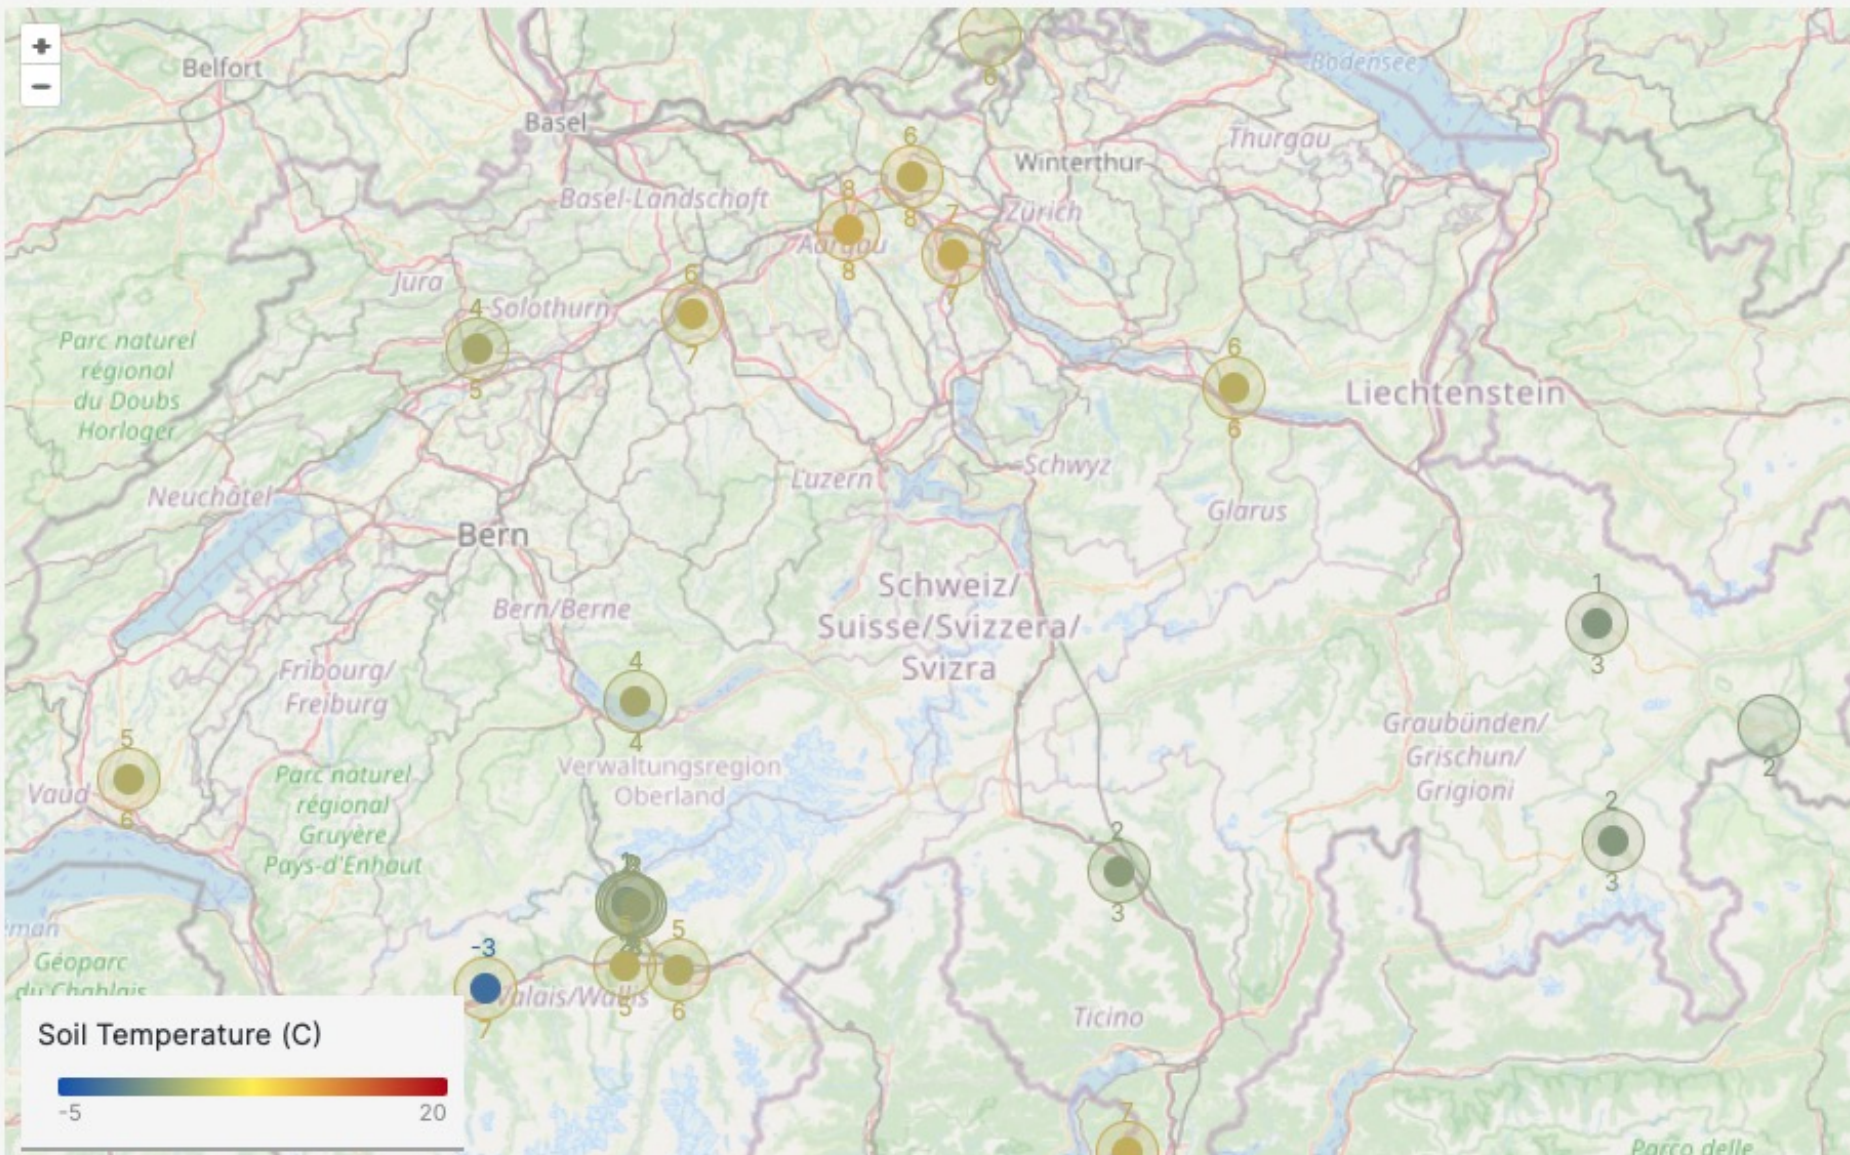

Name	Mean	Min	Max
Long term average	7.80	1.90	14.5
max	11.8	4.15	19.2
min	2.63	-4.72	9.71
Current year	3.62	2.19	4.94
2022 average	8.19	1.57	15.7

#### Soil Water Matric Potential Topsoil (All sites)

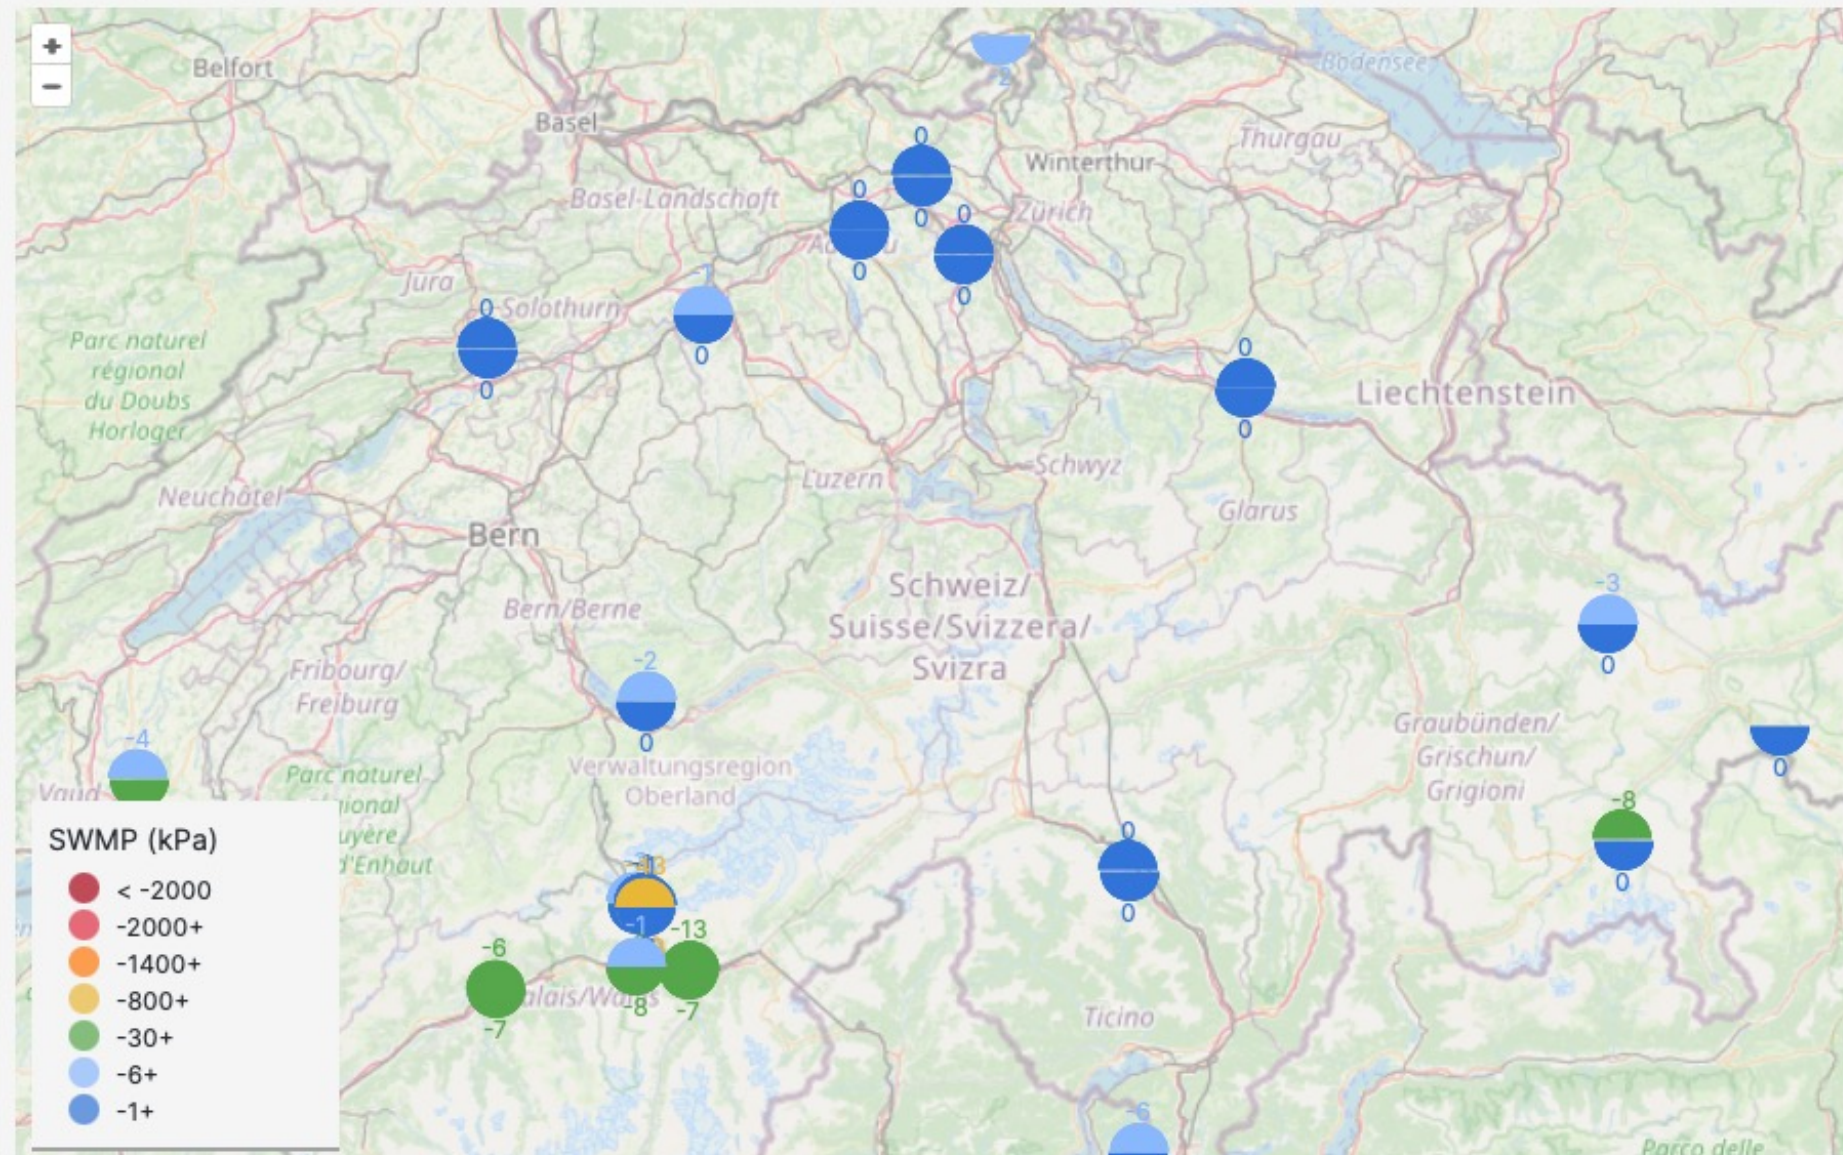

Name	Mean	Min	Max
Long term average	-84.3	-330	-4.90
max	-0.273	-2.28	-0.100
min	-448	-1686	-19.0
Current year	-7.55	-19.7	-2.37
2022 average	-112	-472	-3.13

#### Soil Temperature

#### Soil Water Matric Potential

# Conclusions

Powerful and well structured PostgreSQL database

Custom build and maintained R package for data access

Ready to use dashboards for Internal and Public data visualization

# Thank You

Trotsiuk Volodymyr
