

Taxus baccata L. (Eibe)

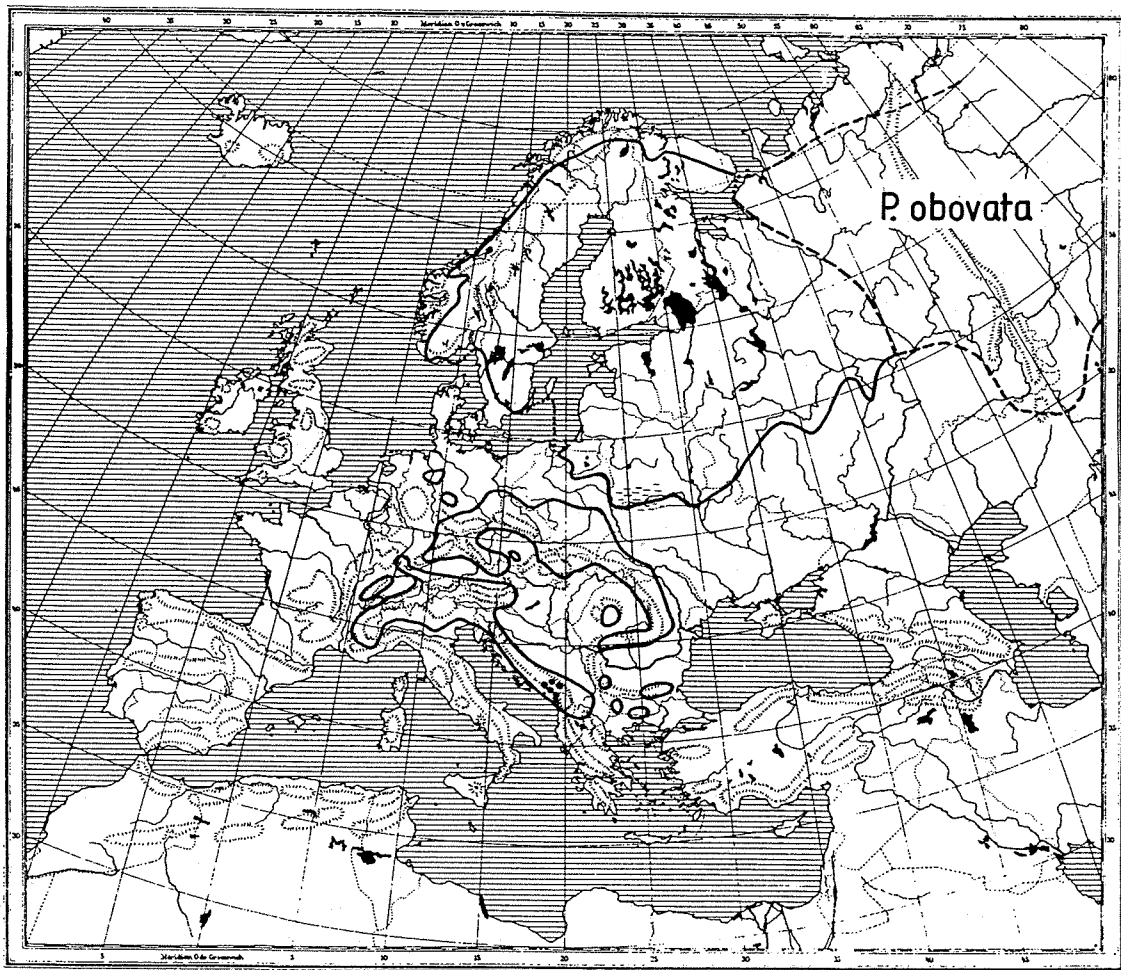

Arealkarten mitteleuropäischer Waldbaumarten
 Quelle: Professuren für Waldbau, Forstschutz + Dendrologie, ETHZ

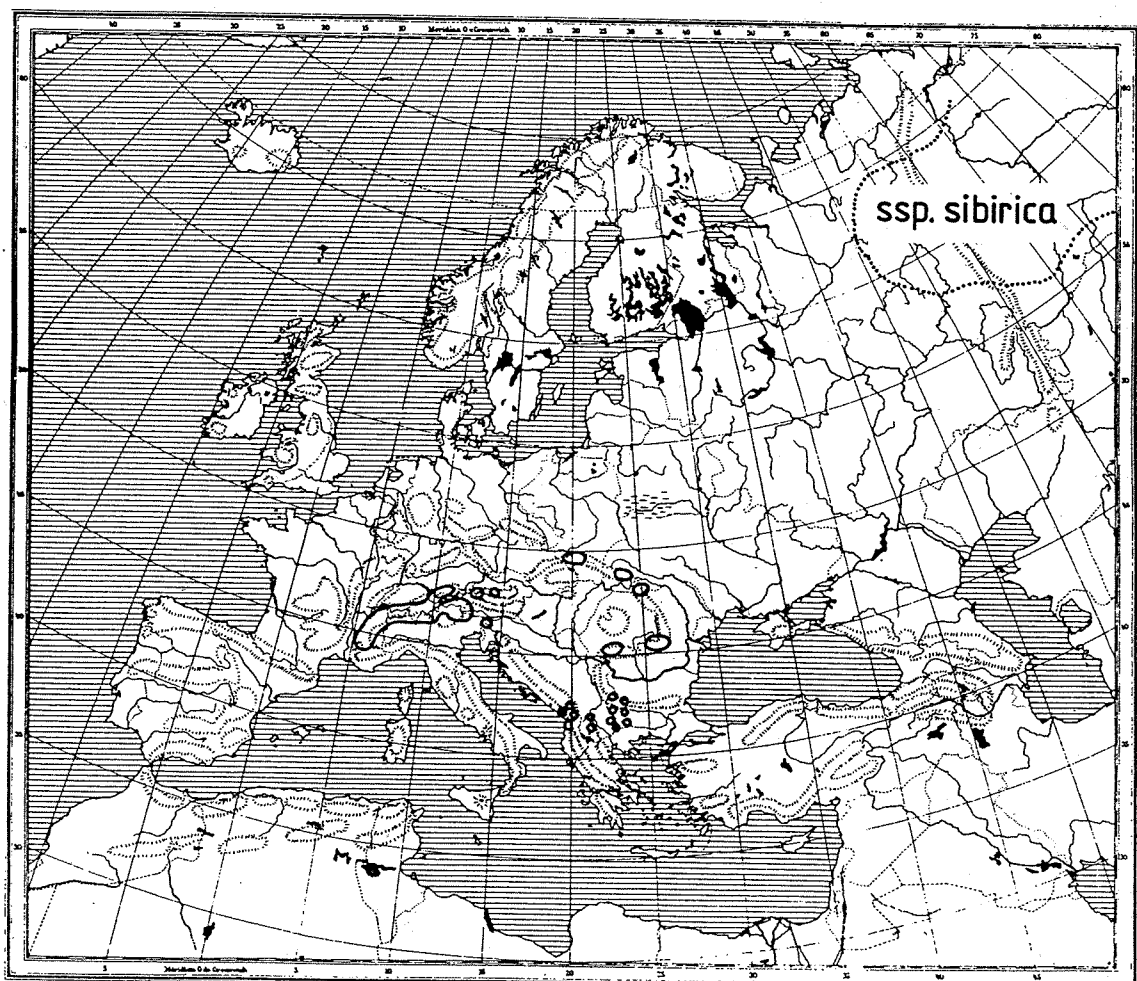

Abies alba Mill. (Weisstanne)

Larix decidua Mill. (Lärche)

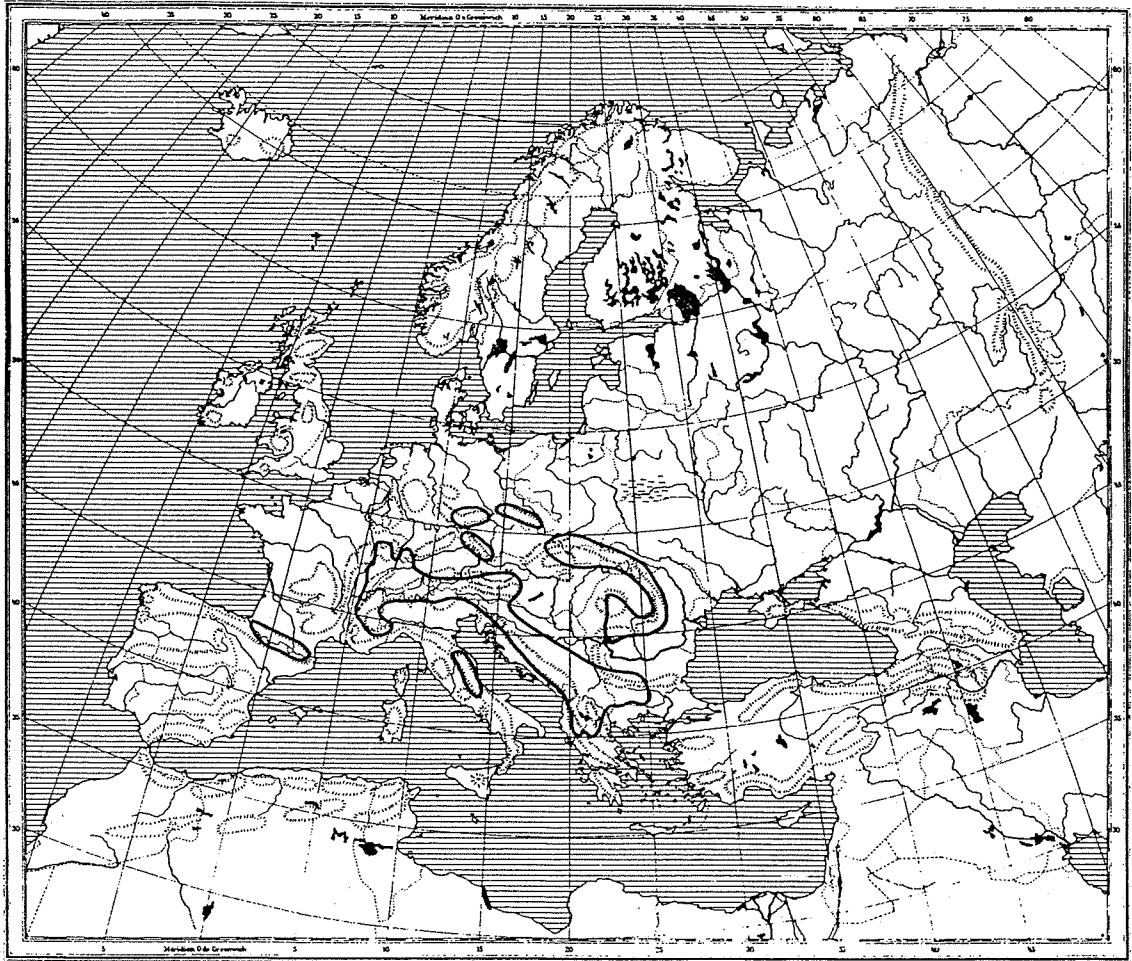

Picea abies (L.) Karst. (Fichte)  *Picea omorika* (Panc.) Purk. (serbische Fichte)

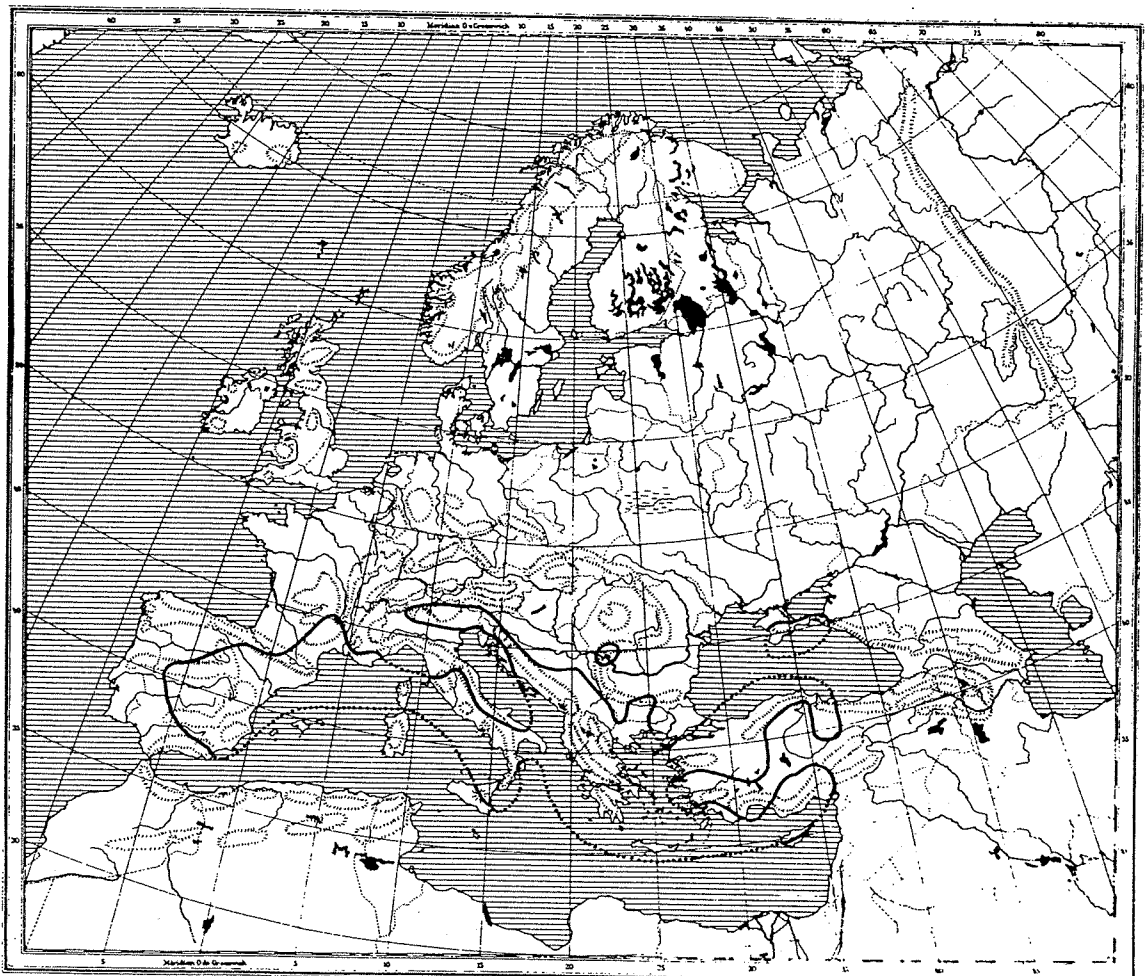

Pinus cembra L. (Arve)

 *Pinus peuce* Griseb.

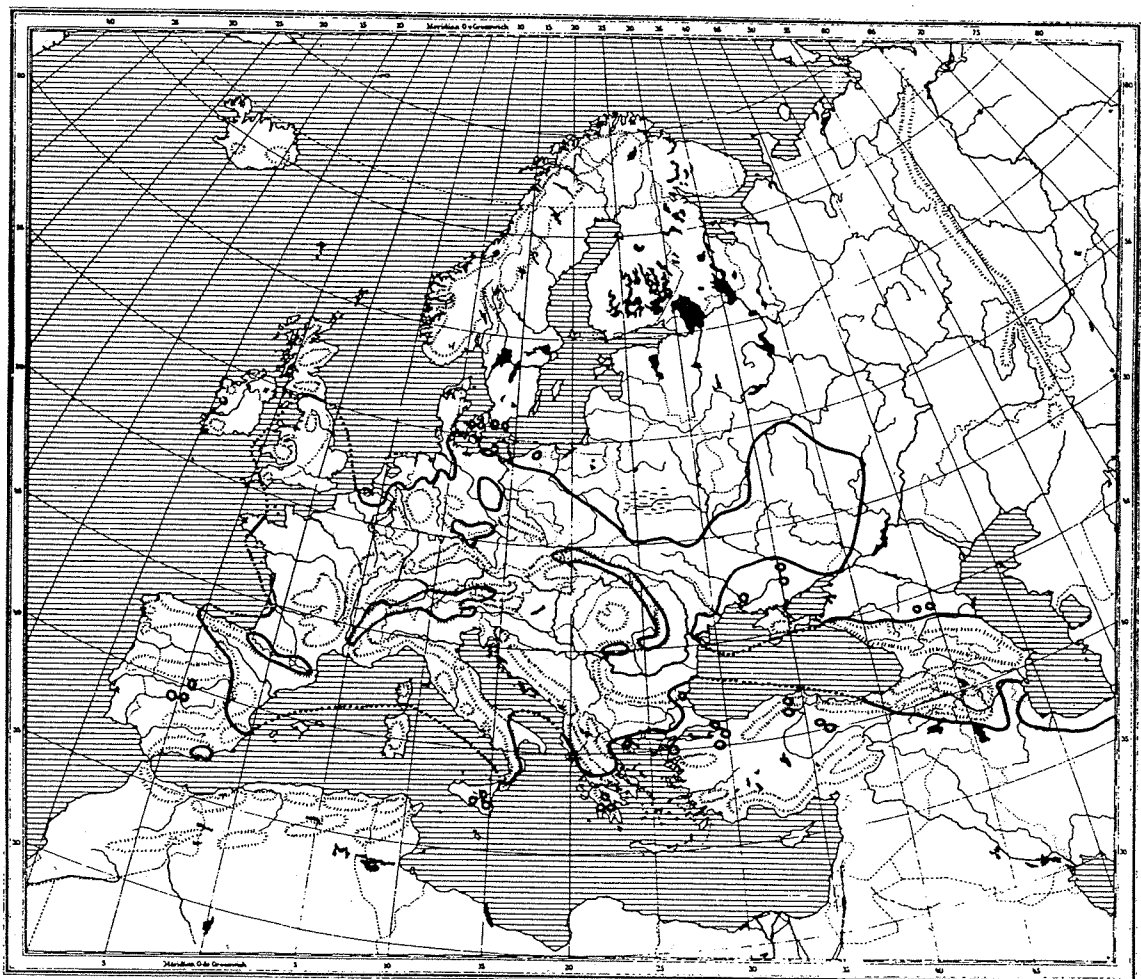

Pinus mugo Turra (Bergföhre)

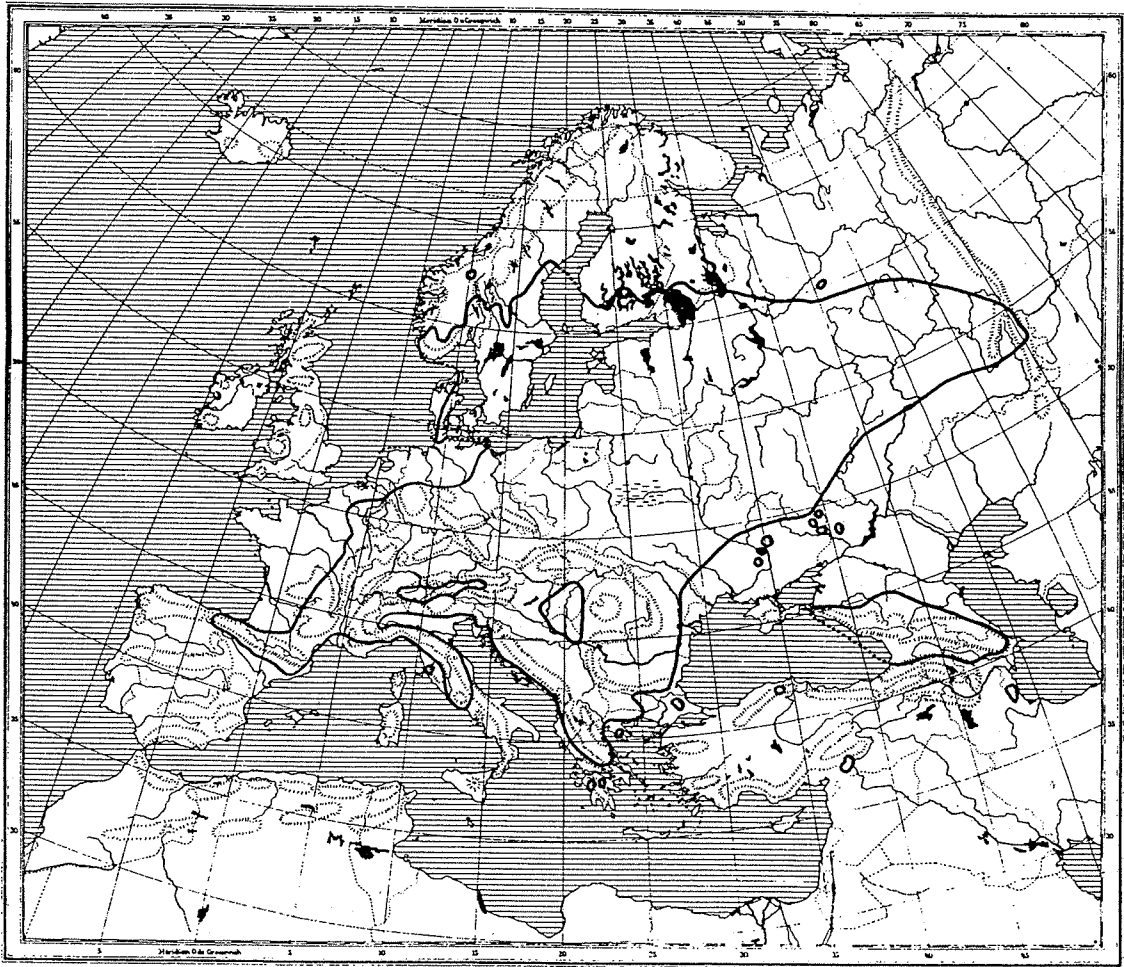

Pinus nigra Arnold (Schwarzföhre)

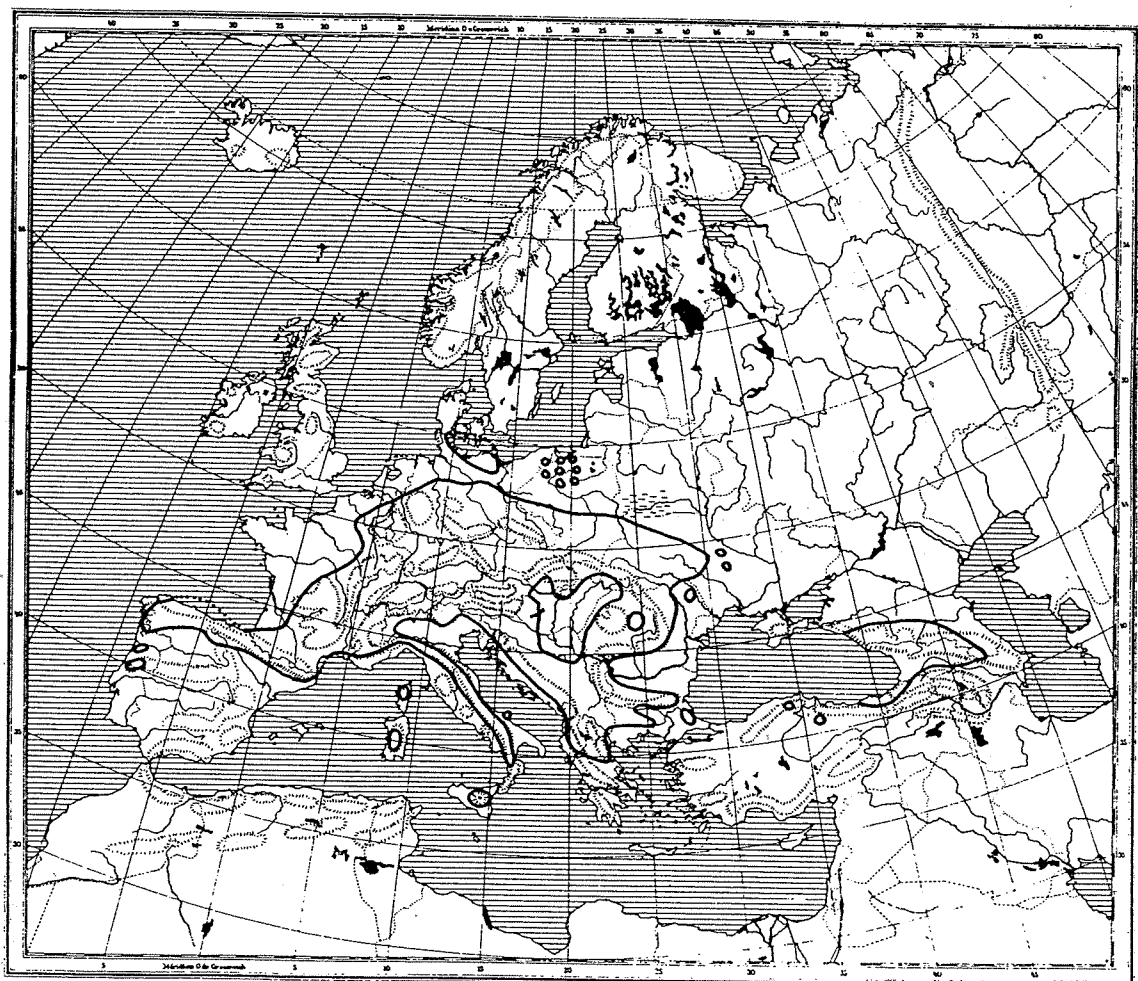

Pinus silvestris L. (Waldföhre)

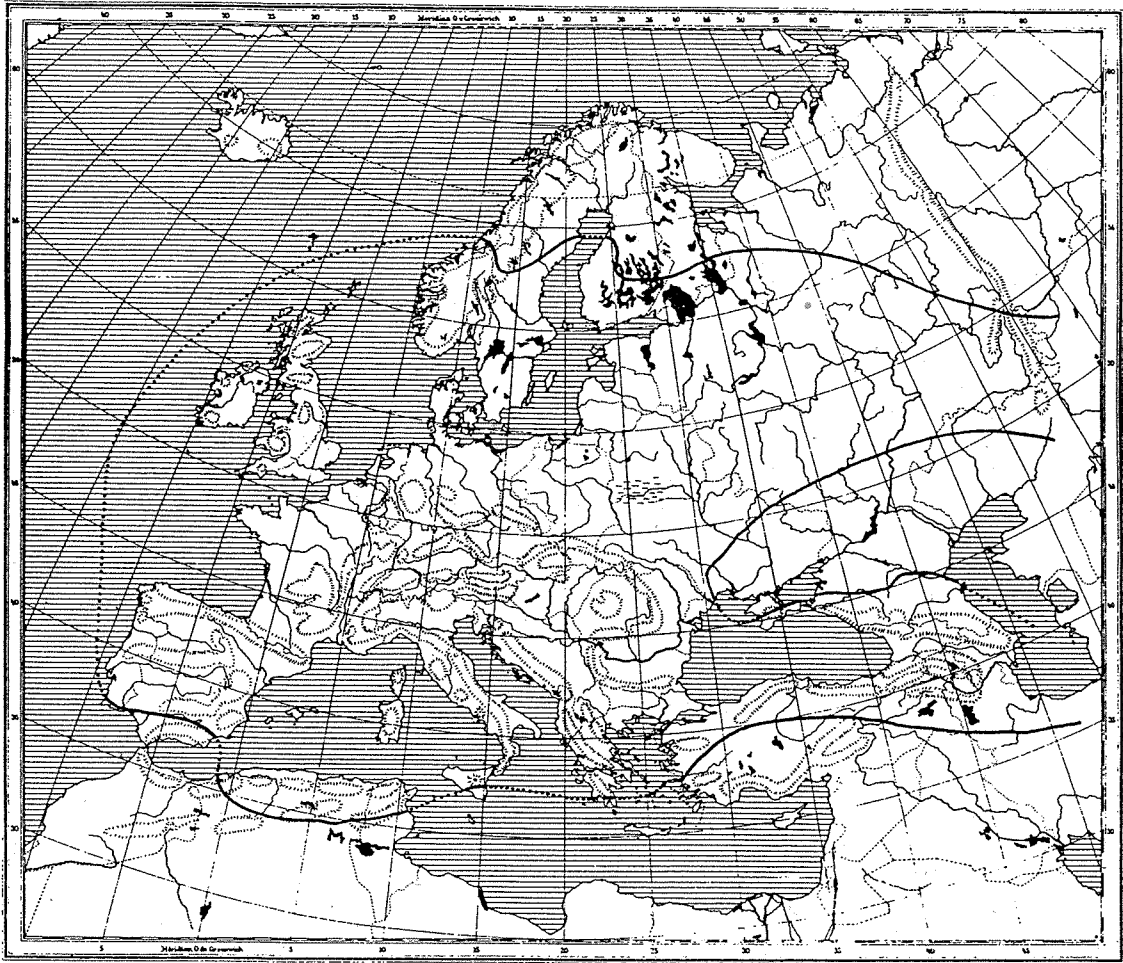

Acer campestre L. (Feldahorn)

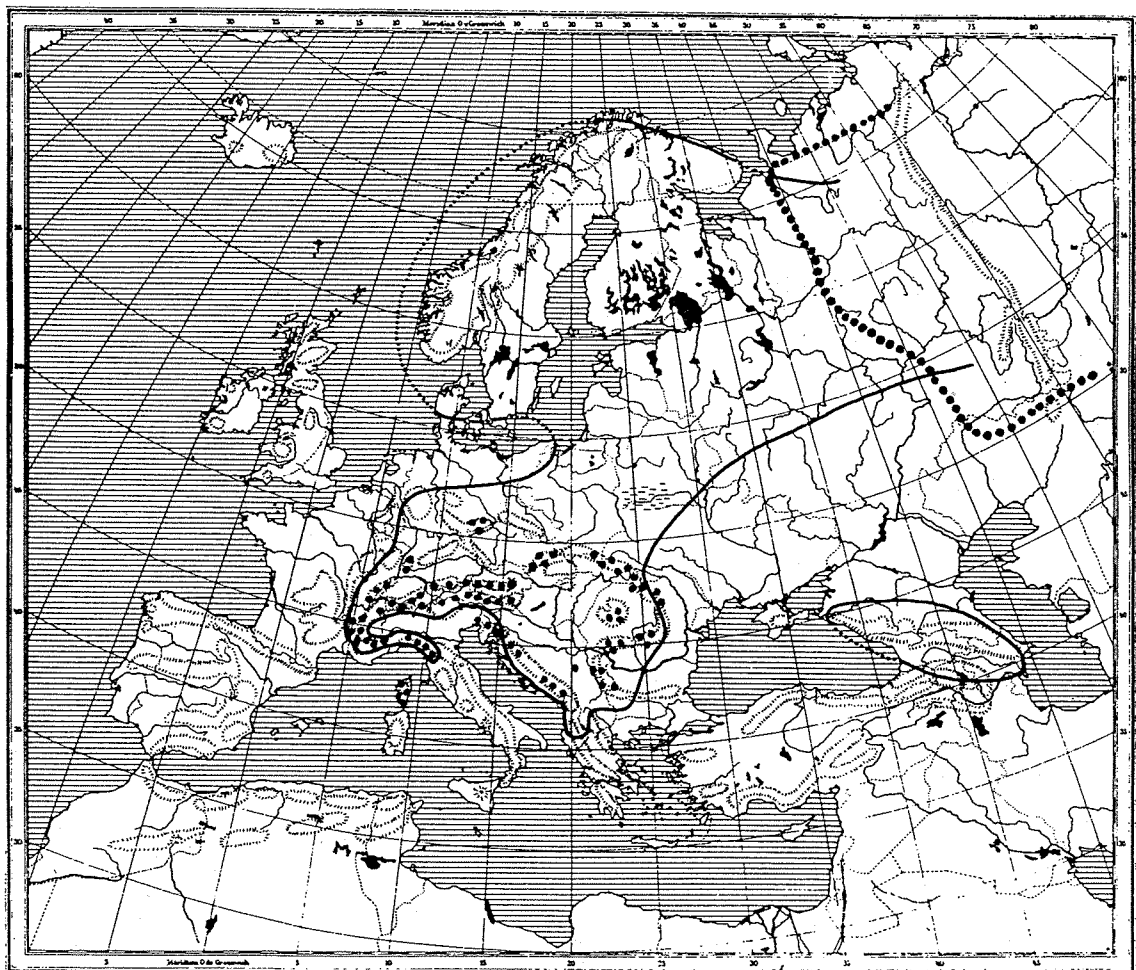

Acer platanoides L. (Spitzahorn)

Acer pseudoplatanus L. (Bergahorn)

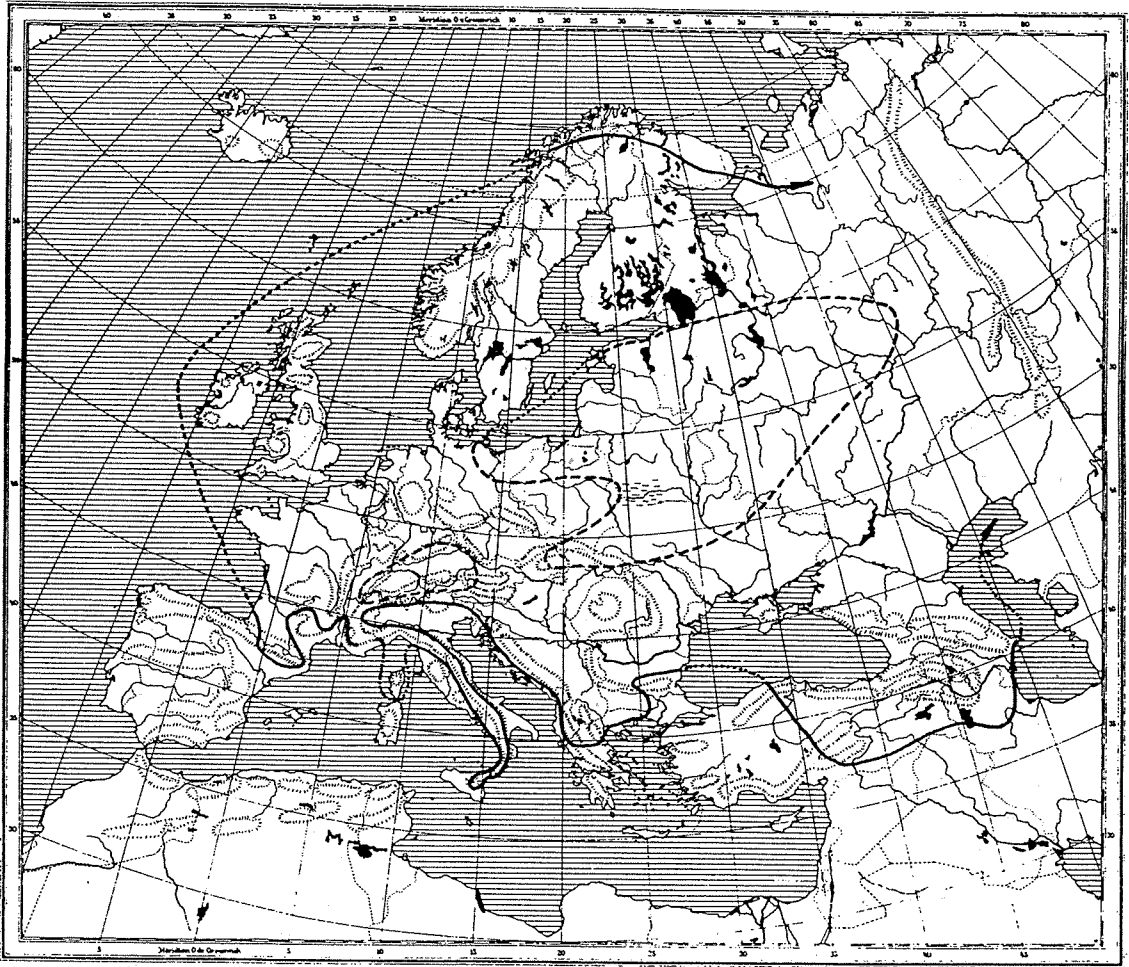

Alnus glutinosa (L.) Gaertn. (Schwarzerle)

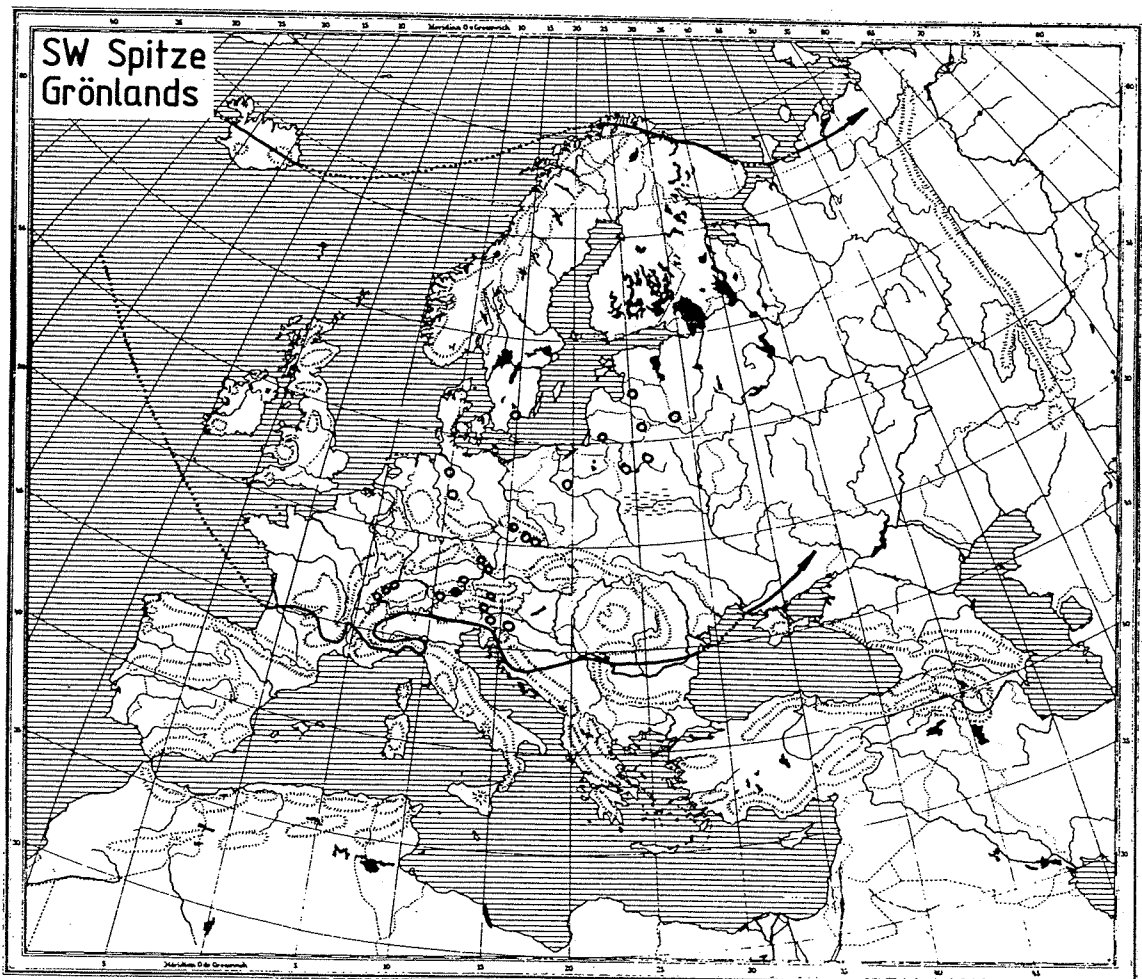

Alnus incana (L.) Moench. (Weisserle)

... Alnus viridis (Chaix.) DC. (Grünerle)

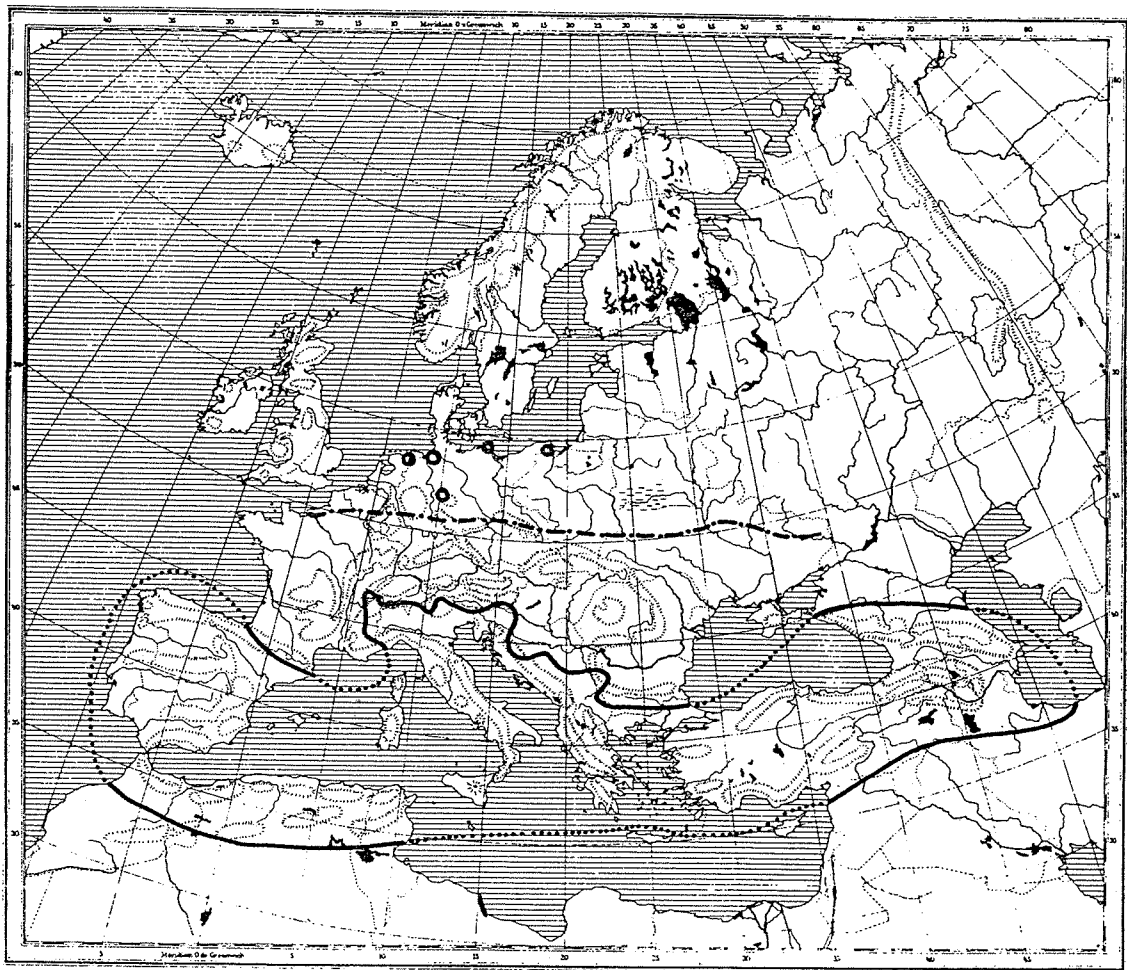

Betula pendula Roth (Warzenbirke) --- *Betula humilis* Schrank (Strauchbirke)

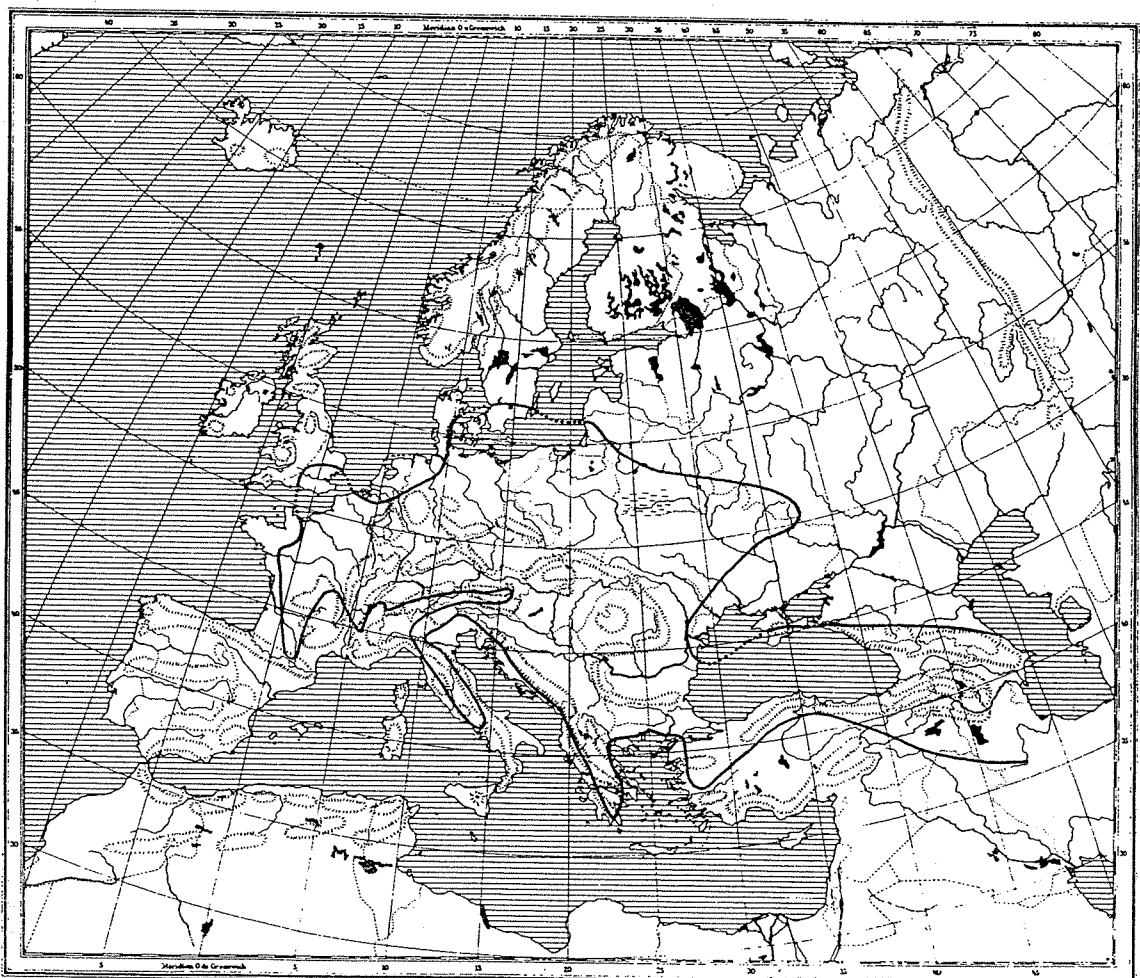

Betula pubescens Ehrh. (Haarbirke)

⊙ *Betula nana* L. (Zwergbirke)

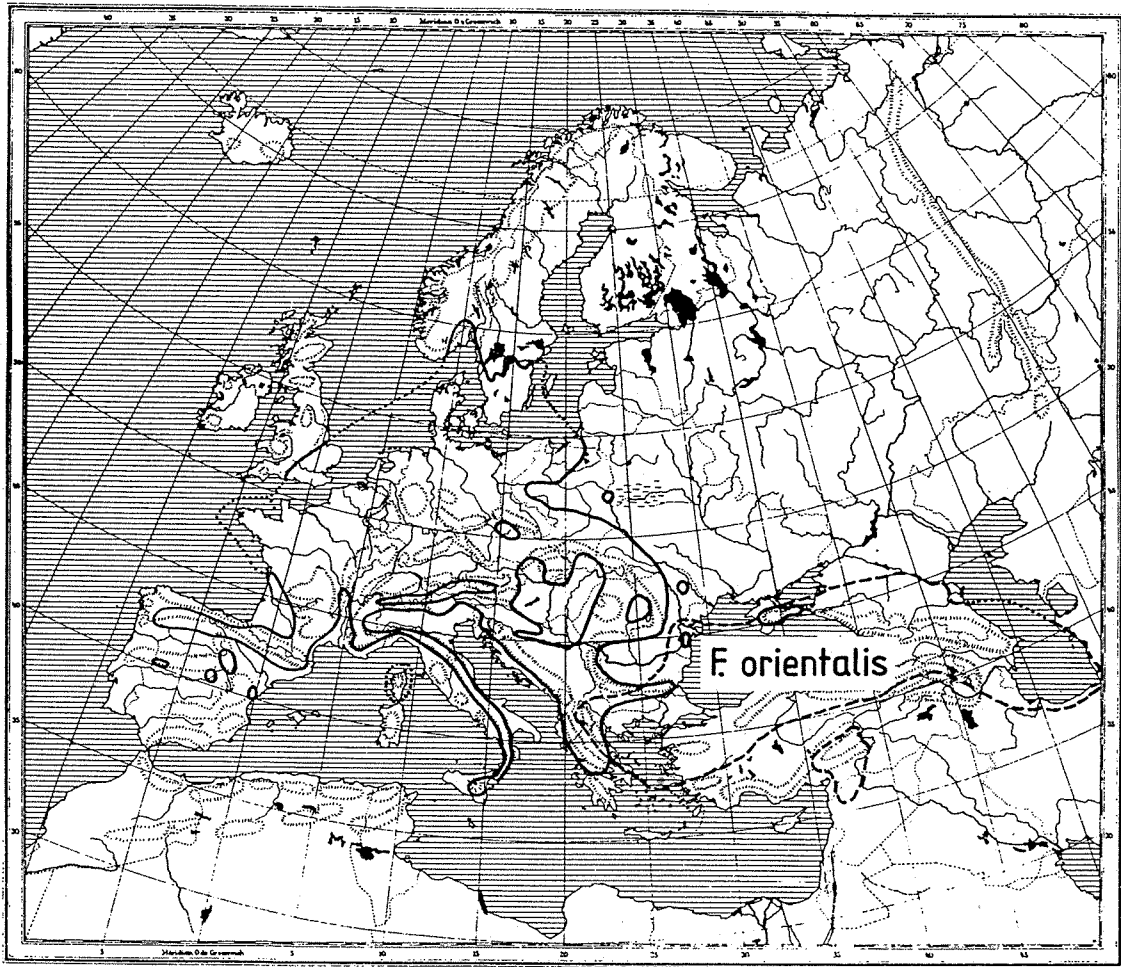

Castanea sativa Mill. (Edelkastanie)

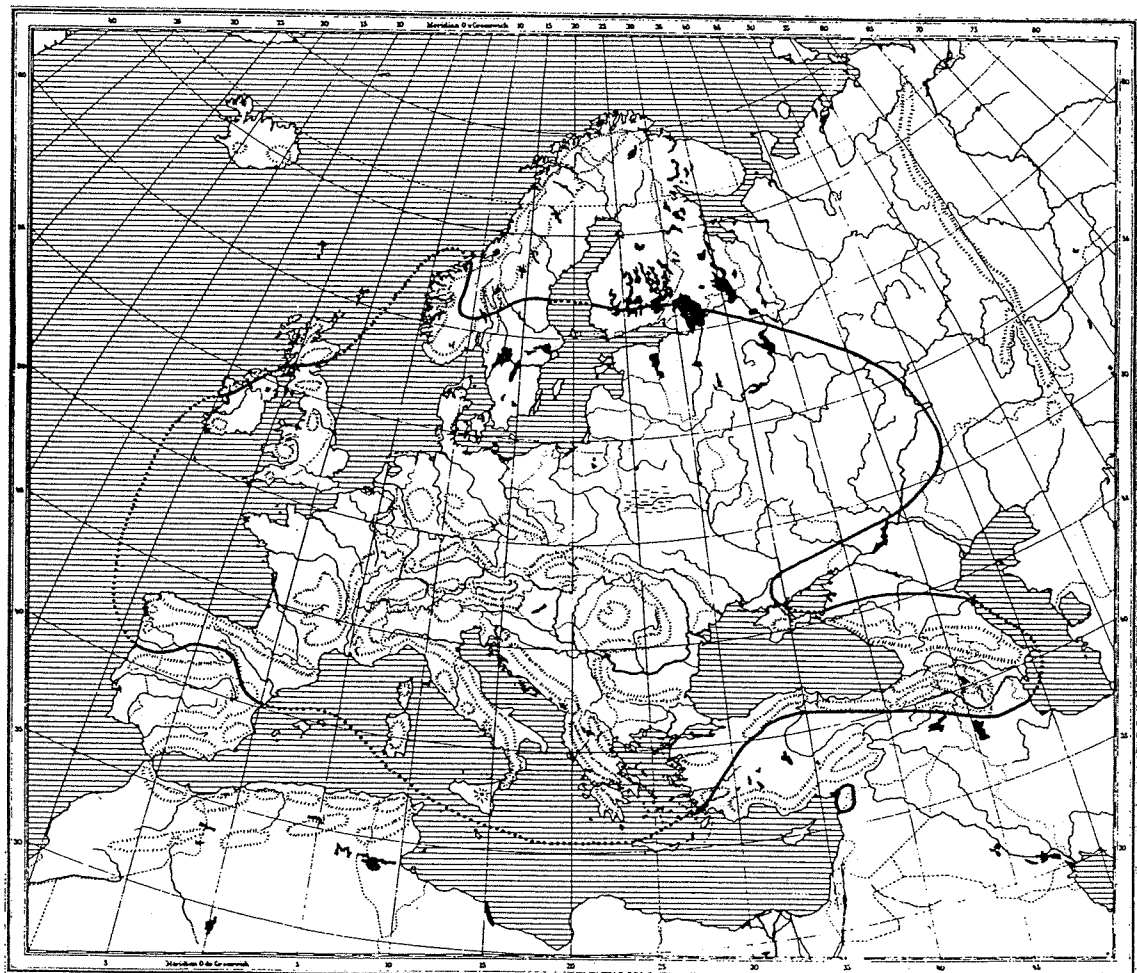

○ künstliche Einzelvorkommen
 --- nördliche Grenze für Fruchtreife

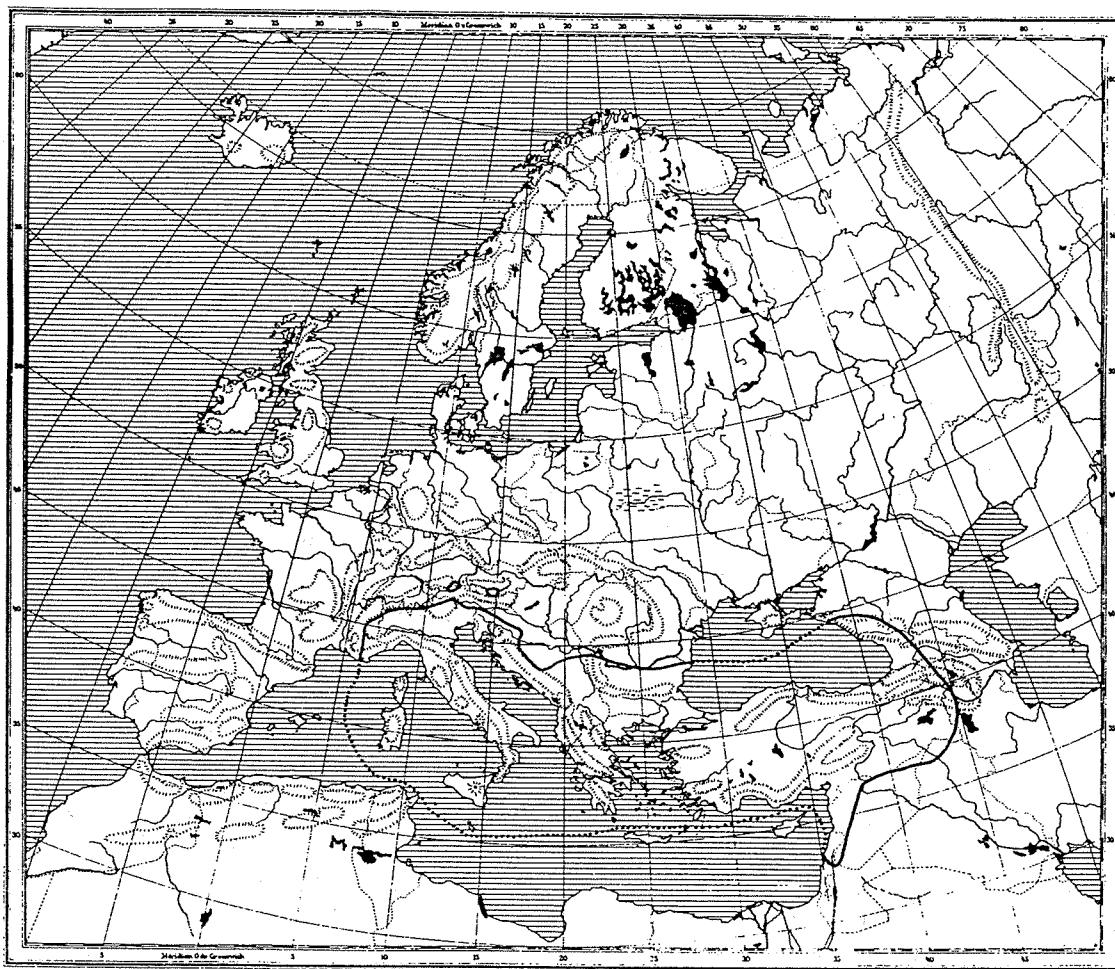

Carpinus betulus L. (Hagebuche)

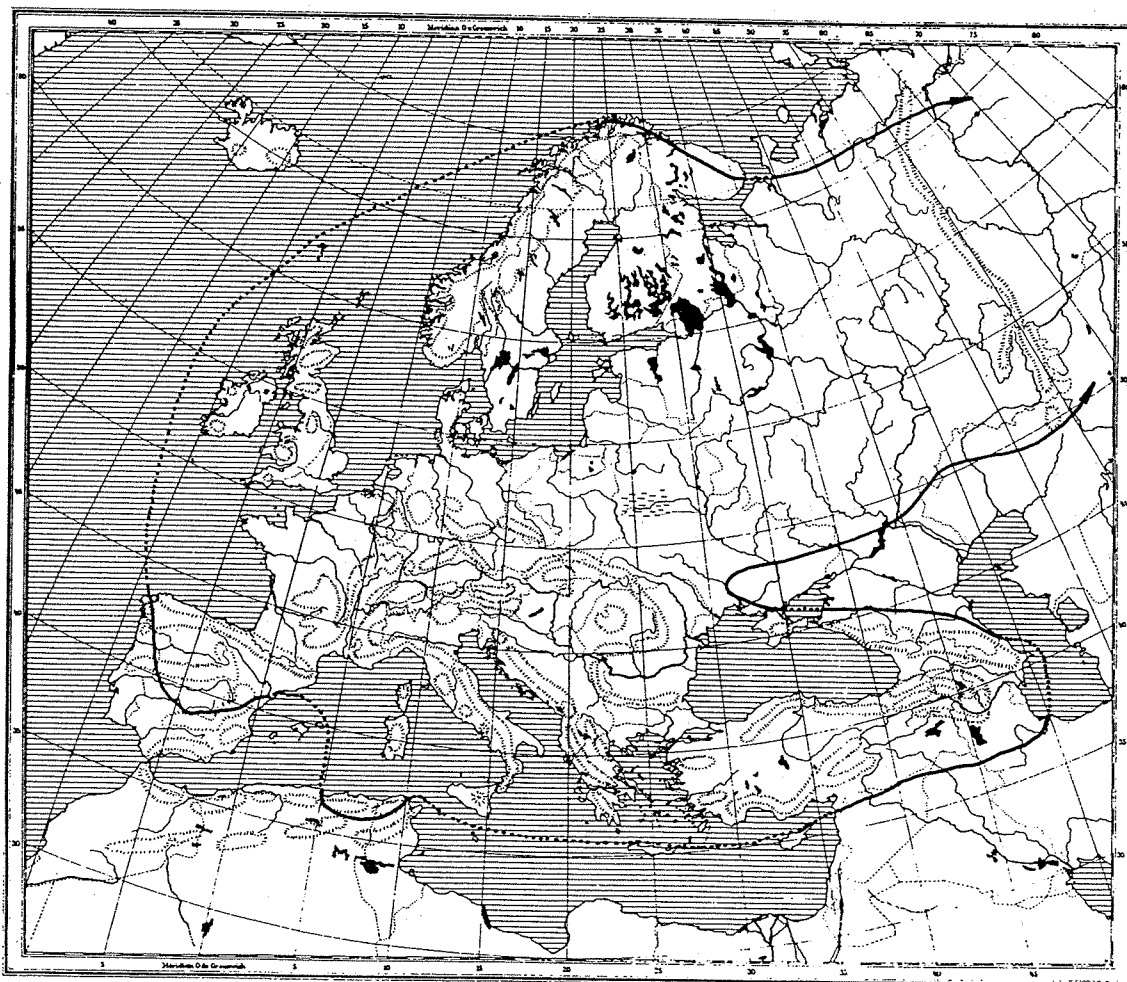

Fagus silvatica L. (Buche) *Verbreitung:* *Buche: F.*

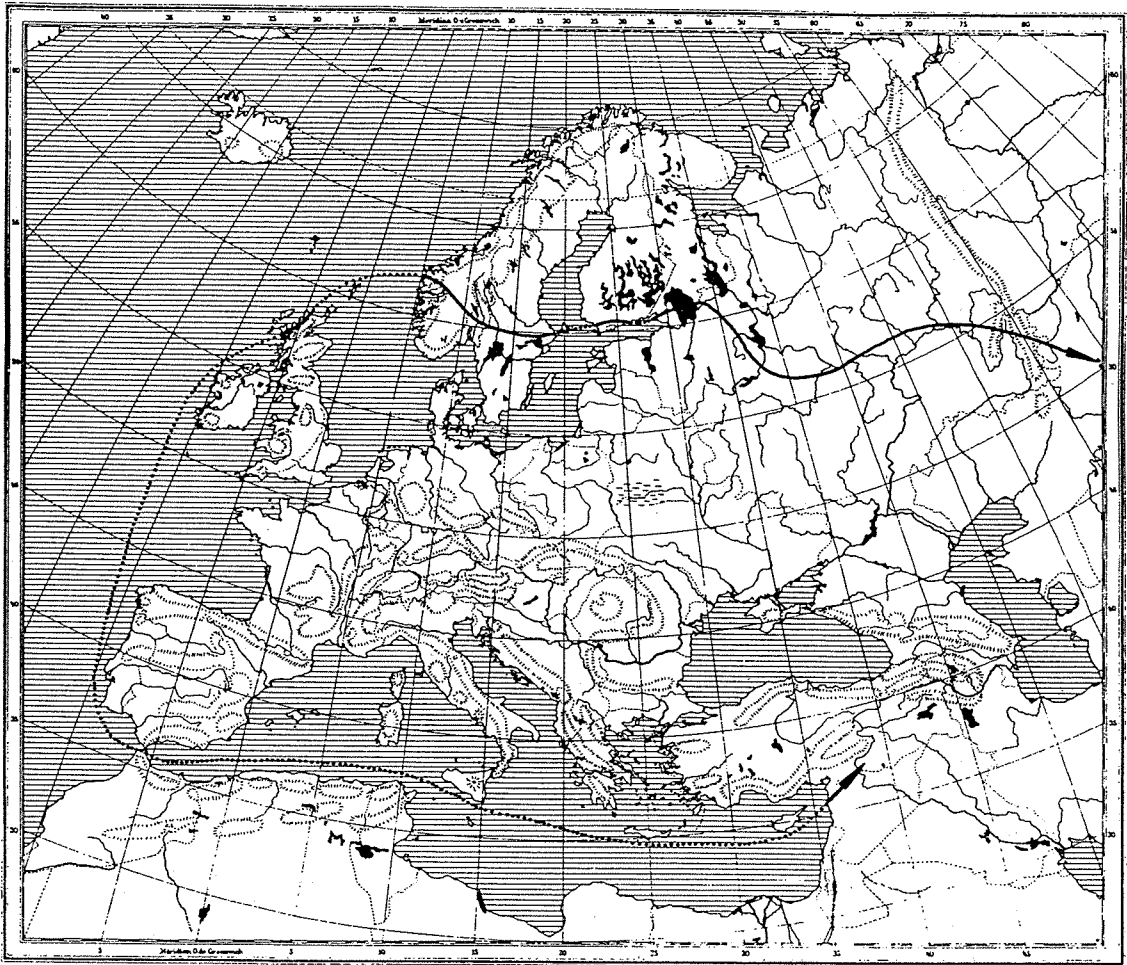

Fraxinus excelsior L. (Esche)

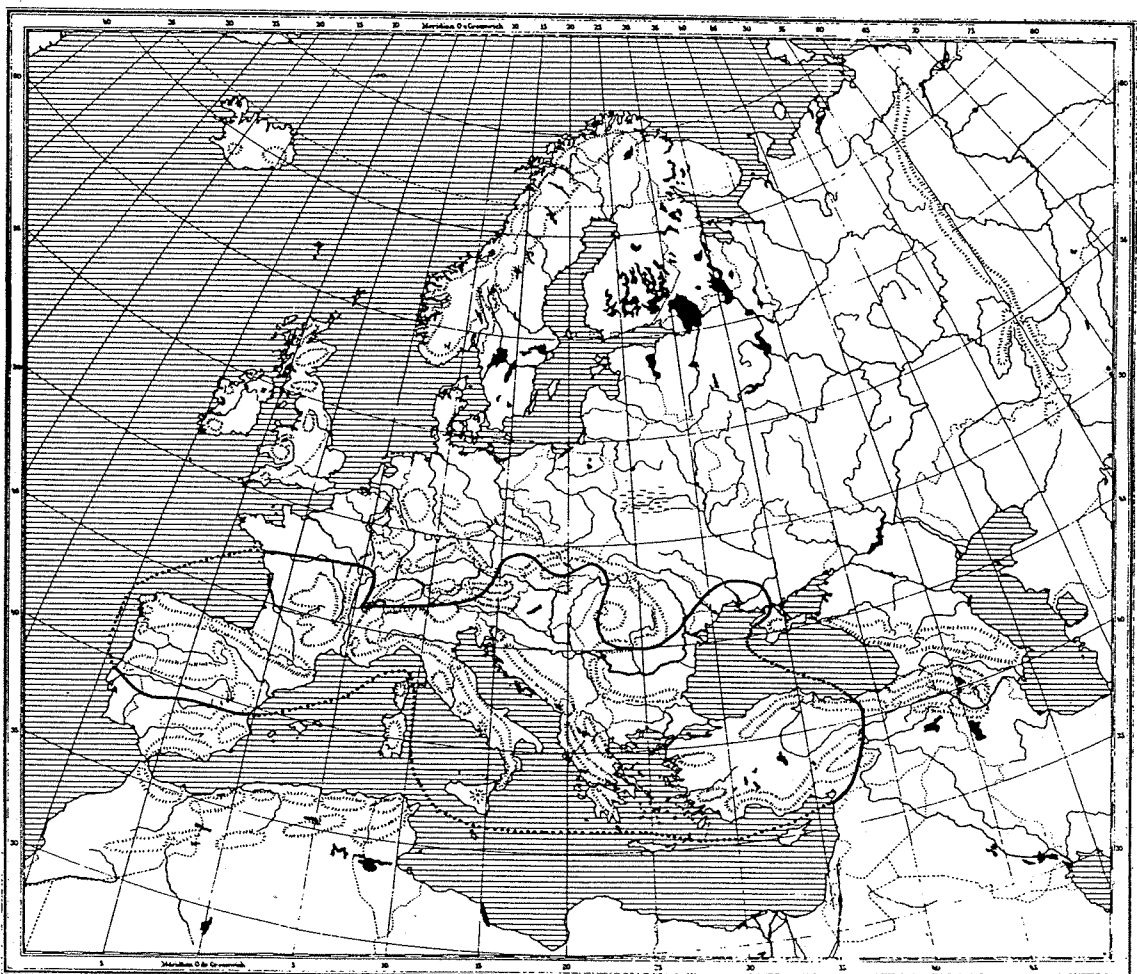

Ostrya carpinifolia Scop. (Hopfenbuche)

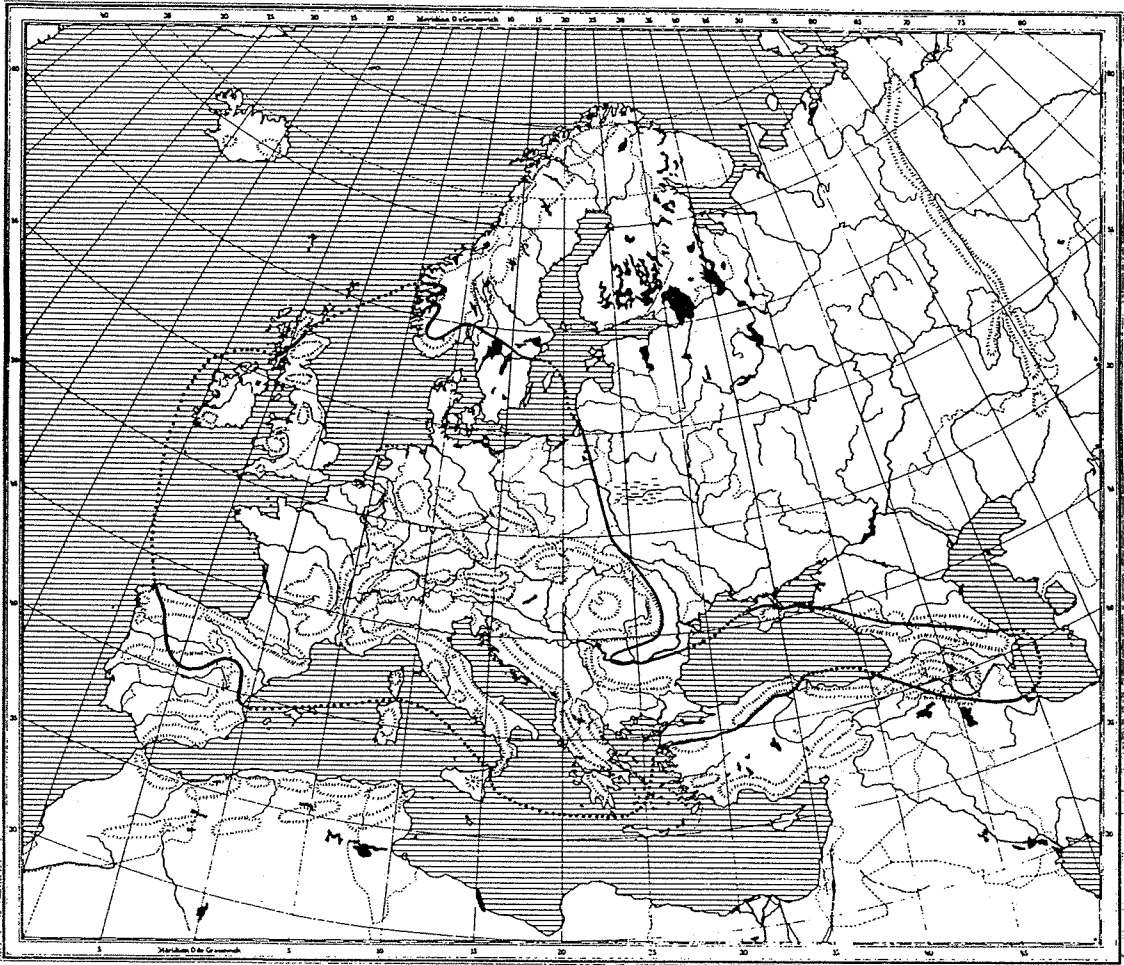

Populus tremula L. (Aspe)

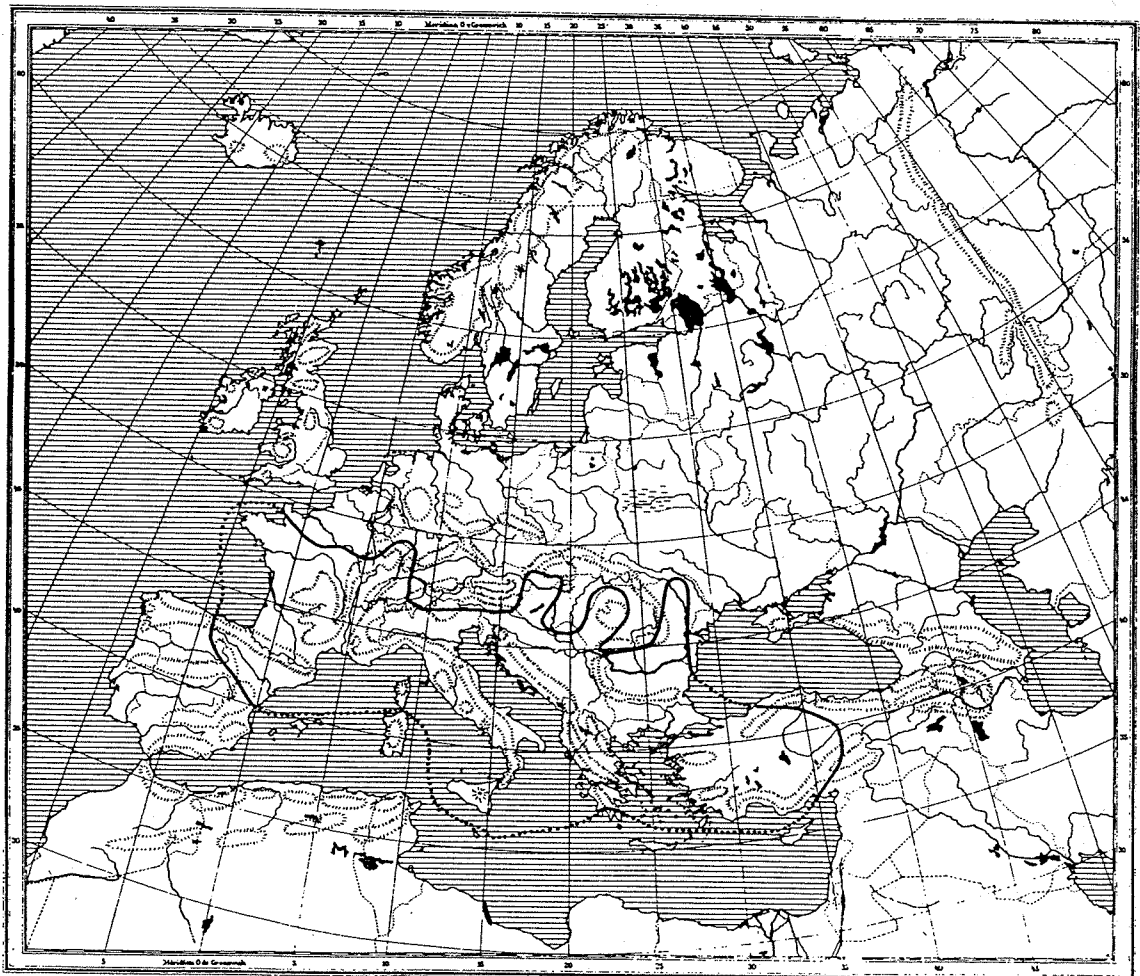

Prunus avium L. (Vogelkirsche)

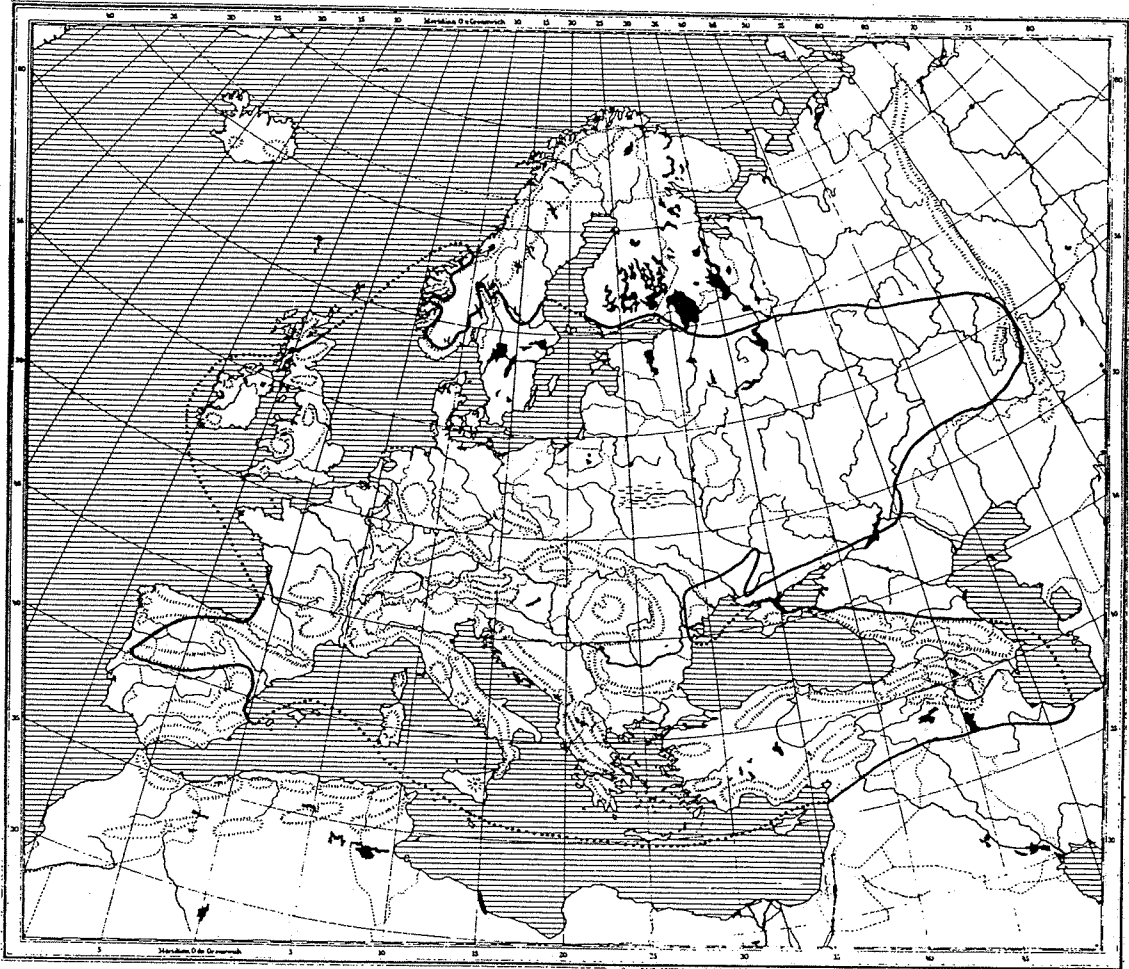

Quercus cerris L. (Zerreiche)

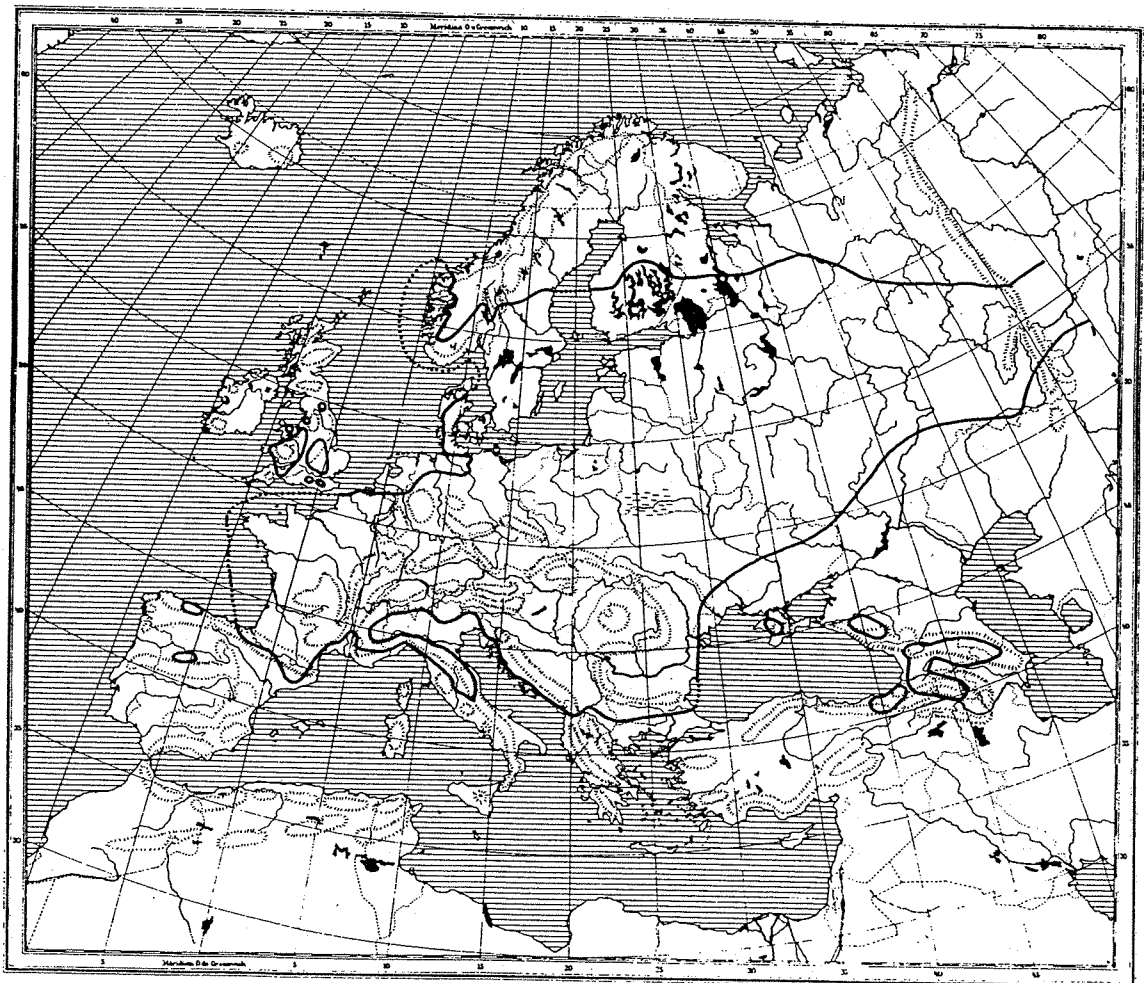

Quercus petraea (Mattuschka) Liebl. (Traubeneiche)

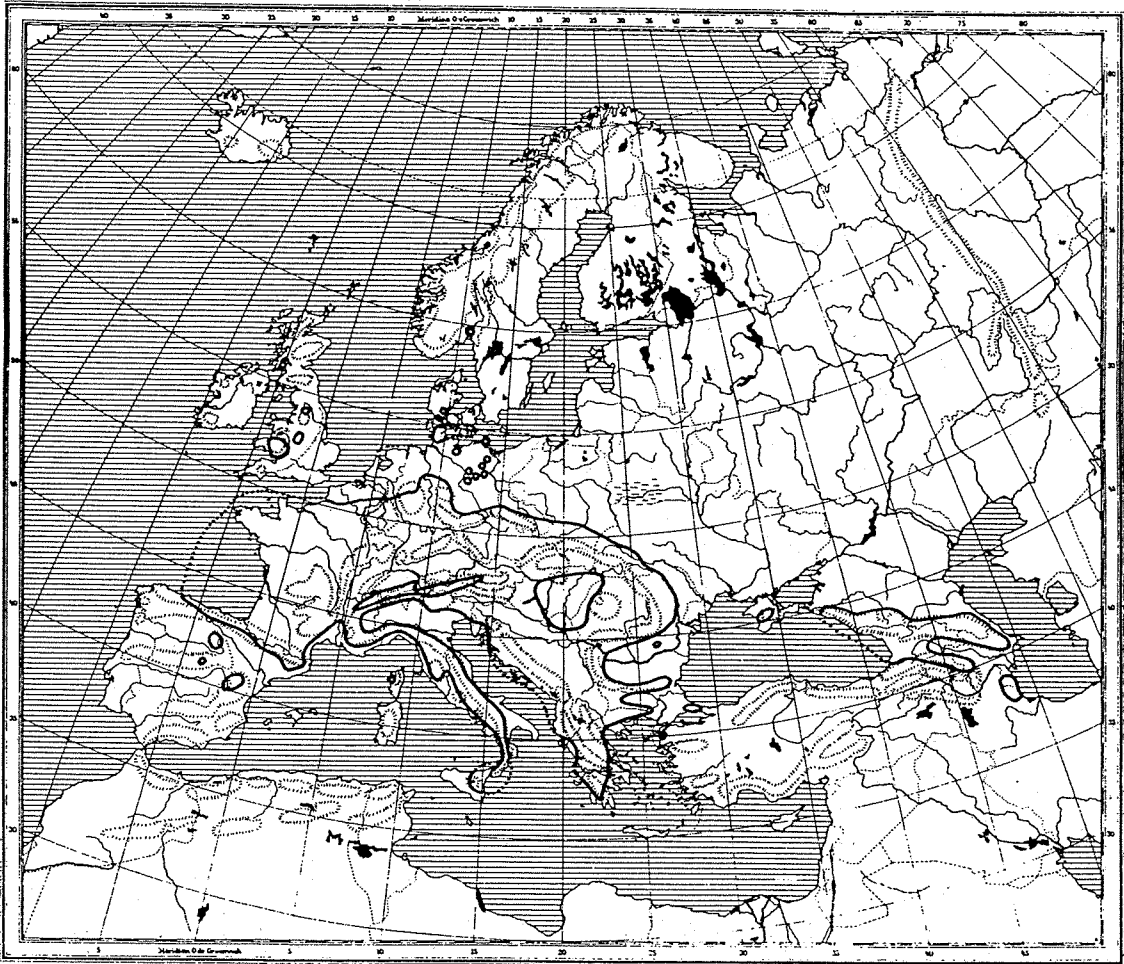

Quercus pubescens Willd. (Flaumeiche)

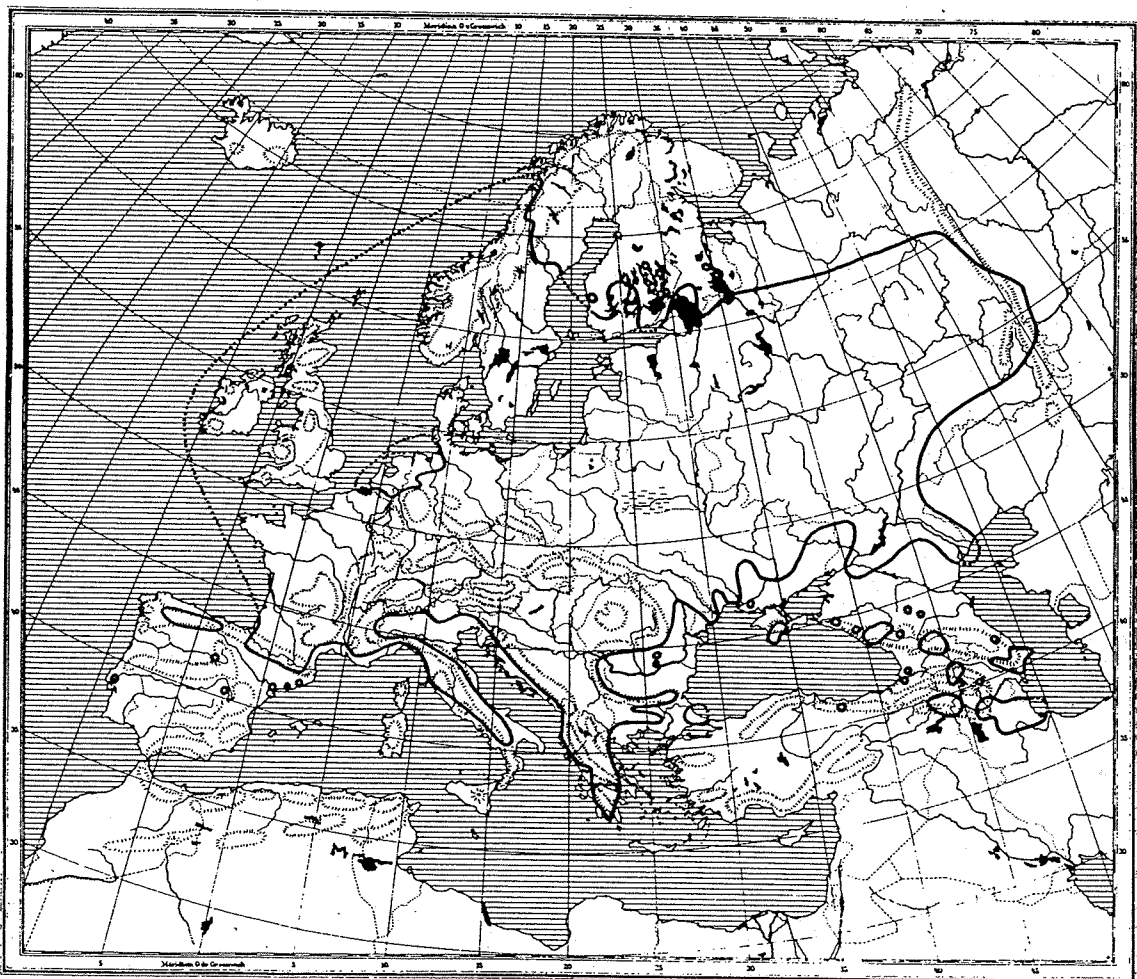

Quercus robur L. (Stieleiche)

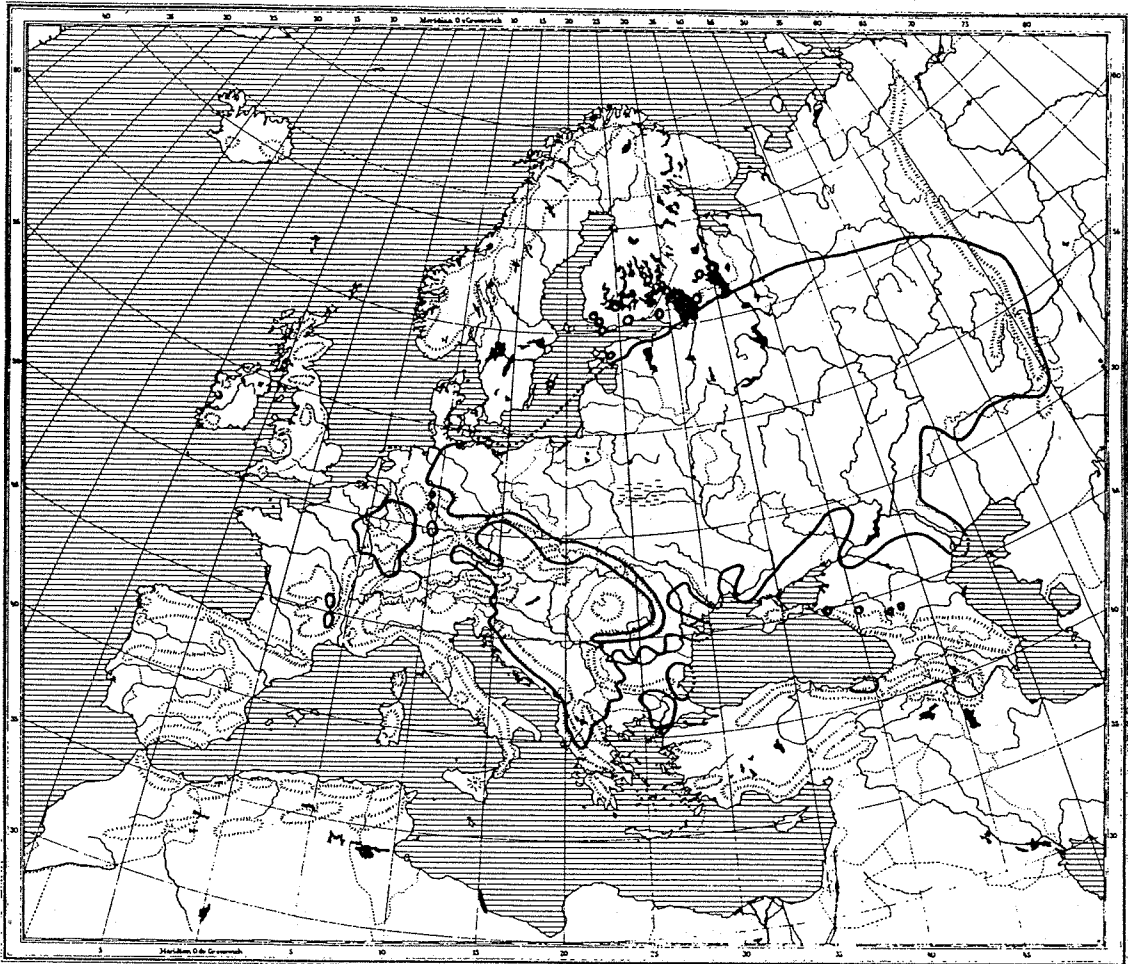

Tilia cordata Mill. (Winterlinde)

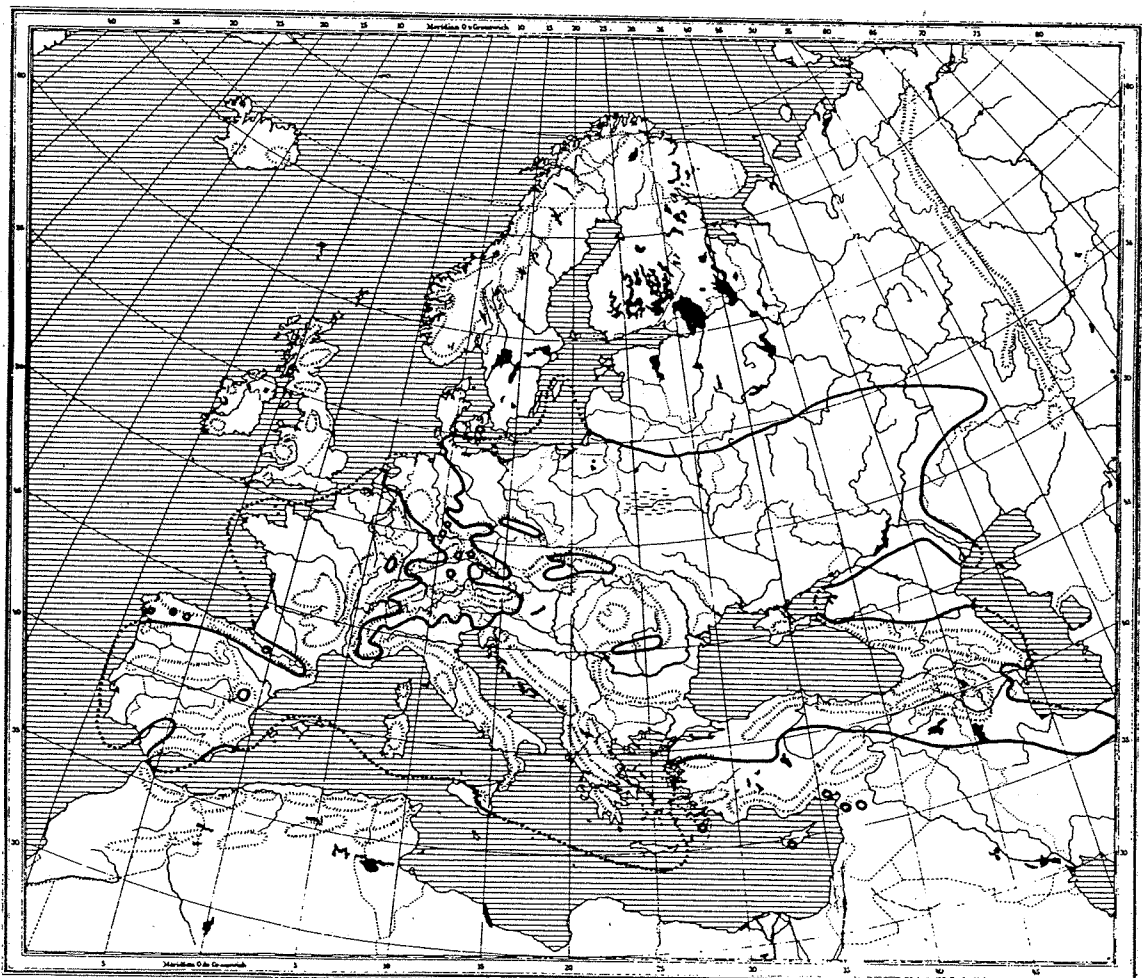

Tilia platyphyllos Scop. (Sommerlinde)

Ulmus glabra Huds. emend. Moss. (Bergulme)

Ulmus laevis Pall. (Flatterulme)

Ulmus minor Mill. emend. Richens (Feldulme)
